

Are there any gaps in energy storage technologies?

Even though several reviews of energy storage technologies have been published, there are still some gaps that need to be filled, including: a) the development of energy storage in China; b) role of energy storage in different application scenarios of the power system; c) analysis and discussion on the business model of energy storage in China.

Is small-capacity energy storage suitable for negotiated lease mode and Energy Performance Contracting?

In the follow-up research, the application scenarios and business models of energy storage should be studied in detail according to the type of energy storage. According to this study, small-capacity energy storage is suitable for negotiated lease mode and energy performance contracting model.

How is energy storage developing in China?

However, China's energy storage is developing rapidly. The government requires that some new units must be equipped with energy storage systems. The concept of shared energy storage has been applied in China, which effectively promotes the development of energy storage. 4.3. Explore new models of energy storage development

What are the application scenarios of energy storage in China?

It also introduces the application scenarios of energy storage on the power generation side, transmission and distribution side, user side and microgrid of the power system in detail. Section 3 introduces six business models of energy storage in China and analyzes their practical applications.

What are ancillary service business models for energy storage in China?

There are three types of ancillary service business models for energy storage in China. As shown in Fig. 2, the first is the power generation company investment model. Power generation companies use existing funds or bank loans to build and operate energy storage through energy storage operating companies.

Can energy storage be commercialized?

Energy storage has entered the preliminary commercialization stage from the demonstration project stage in China. Therefore, to realize the large-scale commercialization of energy storage, it is necessary to analyze the business model of energy storage.
