

How much does a 1.5kw solar system cost?

Now that we've established the potential savings and benefits of a 1.5kW solar system, let's delve into the cost aspect. The typical price for a 1.5kW solar system is around \$3,000. It's important to note that prices have significantly decreased over the past decade, making solar energy much more accessible and affordable for homeowners.

How much do solar panels cost?

Lower-quality panels can cost about \$550. The actual cost of the system will depend on your location, quality and brand of the solar panels. It is recommended to obtain quotes from local installers to gain an accurate understanding of the cost of a 1.5 kW solar power system and to discover what rebates and incentives are available in your region.

How much money can a 1.5 kW solar system save?

On average, you can save up to \$50 per month with a 1.5 kW system. However, the savings may be substantially reduced if most of the energy the system generates is exported back to the grid. This means you will have more savings if you use most of the electricity your solar system generates. Here are examples for better understanding:

How efficient is a 1.5kw solar system?

A 1.5kW solar system is a cost-effective and efficient option for homeowners, producing an average of 5.5-6.5kWh daily with potential financial savings from reduced energy bills and revenue generation via feed-in tariffs. Factors such as shading, roof orientation, pitch temperature & dirt can affect the system's efficiency.

How much energy does a 1.5 kW solar system produce?

A 1.5 kW solar system generates about 6 kWh of energy per day, which is enough to run a third (33.33%) of an average Australian home. If you have a highly efficient home, this system may provide up to 100% of the energy required. The energy output of a 1.5 kW solar system is 6 kWh per day.

How much does a solar battery cost in Australia?

The energy output of a 1.5 kW solar system is 6 kWh per day. In this case, a battery with a capacity of 4.2 kWh would be ideal. Battery systems cost about \$800 to \$2,000 per kWh in Australia.
