

Who is 2G Energy AG?

2G Energy AG is one of the leading international manufacturers of combined heat and power (CHP) plants for decentralized generation and supply of electricity and heat. We invite you to get a comprehensive picture of our company on the following pages.

What is 2G Energy?

2G Energy refers to modular CHP (Combined Heat and Power) cogeneration systems. This site, for instance, uses (2 units) of 2G Energy's avus 1,000b units, each with an output of 1142 kW. They include the 2G Master PLC (MPLC) for load sharing and future control capabilities, for optimum efficiency and resiliency. These systems utilize LNG as fuel, eliminating the need...

What distinguishes 2G as a technological partner?

2G is your companion on the journey towards an ecologically and economically sustainable future. Throughout the world, our innovative energy solutions reliably assist you in reaching your goals.

Is 2G a renewable fuel?

For the past 25 years, 2G's core business was built around the other renewable fuel- biogas. With 7,500 projects deployed in over 55 countries, we boast one of, if not the highest percentage of renewably fueled fleets on the planet. Biogas, RNG, syngas and hydrogen are all commercially viable fuels for 2G.

Will 2G be a future proof investment?

High ROI Future Proof investments A key focus for 2G from the onset of the hydrogen technology development was the possibility of retrofitting existing natural gas or biogas-operated systems for operation with hydrogen. 2G's standard products can be operated with a mixing ratio of up to 40% hydrogen with no changes to the hardware required.

What fuels can be used for 2G?

Biogas, RNG, syngas and hydrogen are all commercially viable fuels for 2G. "The spirit of innovation that has always been strong at 2G, coupled with many years of experience in the field of gas engine development, was the ideal foundation to enable the use of hydrogen in CHP units", explains 2G CTO Frank Grewe.

The g-box by 2G is a refined natural gas and biogas CHP system, boasting an electrical output of 20 to 50 kW, ideally suited for the serene environmen... [Press Enter to the main content area ...](#)

2G Energy AG is one of the leading international manufacturers of combined heat and power plants (CHP) for the decentralised generation and supply of electricity and heat. The 2G product range includes CHP systems with an electrical output between 20 kW and 2,500 kW for operation with natural gas, biogas, other lean gases, biomethane and hydrogen.

2G is exhibiting at the HEA's 2024 Annual Conference on 23rd May. The HEA's 2024 Annual Conference: Acting on Ambition, brings together 500+ key stakeholders from the UK's hydrogen sector - including the most influential and ambitious hydrogen leaders, new innovative businesses entering the space, energy-intensive users transitioning or interested in transitioning with ...

With an output range of 527 to 4,500 kW, the avus is 2G's most expansive combined heat and power system, delivering versatile energy solutions for pub...

Advance towards a sustainable green corporation and achieve green energy without borders. J& V Energy is proactively strengthening the Group's deployment within the major trends of energy transformation and currently holds ground, rooftop, and floating photovoltaic systems across Taiwan with a total device capacity of over 300 MW--a number that keeps growing every day.

2G Energy Ltd is the UK subsidiary of the 2G Energy AG group based in Runcorn, Cheshire. Established in 2011, we have grown quickly and to date have supplied and installed CHP plants for both biogas and natural gas applications.

While during the time of the IPO, with the original name of "2G Bio-Energietechnik AG", the main focus stayed on the role as manufacturer of biogas cogeneration plants, the strategic position has increasingly changed since then.
