

## **Additional deduction for energy storage projects**

Will the inflation Reduction Act affect energy storage projects?

Image: President Biden via Twitter. The Inflation Reduction Act's incentives for energy storage projects in the US came into effect on 1 January 2023. Standout among those measures is the availability of an investment tax credit (ITC) for investment in renewable energy projects being extended to include standalone energy storage facilities.

Can a credit be allowed for energy storage technology under Section 48?

Ways and Means Committee Chair Neal stated in a floor statement that "the Committee intends that a credit is allowed for energy storage technology under section 48 regardless of whether it is part of a facility for which a credit under section 45 is or has been allowed." Point of sale for PTC projects.

Which energy storage property is eligible for section 48 ITC?

The IRA expanded the list of property eligible for the Section 48 ITC to include standalone energy storage technology. This includes electrical energy storage property, thermal energy storage property, and hydrogen energy storage property.

Do energy storage projects qualify for a bonus rate?

Energy storage projects (i) not in service prior to Jan. 1, 2022, and (ii) on which construction begins prior to Jan. 29, 2023 (60 days after the IRS issued Notice 2022-61), qualify for the bonus rate regardless of compliance with the prevailing wage and apprenticeship requirements.

Are energy storage projects eligible for a refundable ITC?

Energy storage projects owned by taxable entities are not eligible for a refundable ITC, but instead can take advantage of the new transferability rules. The IRA added a provision to permit project owners (other than tax-exempt entities) to make an election to transfer the ITC to an unrelated third party.

Which energy storage technology qualifies for section 48E?

Any energy storage technology that qualifies under Section 48 also will qualify under Section 48E; this is a different standard than emission-based measurement for generation, which requires zero or net-negative carbon emissions.

On Aug. 16, 2022, President Joe Biden signed into law the Inflation Reduction Act of 2022 (IRA), which includes new and revised tax incentives for clean energy projects. This ...

o Energy storage devices that have a capacity rating of 5 kilowatt hours or greater (even if not charged with solar)  
o For projects 5 MW or less, the tax basis can include the interconnection property costs spent by the project owner to enable distribution and transmission of the electricity

## **Additional deduction for energy storage projects**

On August 16, 2022, President Biden signed into law the Inflation Reduction Act of 2022 (IRA). With many provisions derived from the previously proposed but not passed Build Back Better Act, the law introduces, modifies, extends, and bolsters numerous clean energy tax incentives available to both business and nonbusiness taxpayers.

Clean energy projects beginning construction after December 31, 2024, may be eligible for a credit under IRC Section 48E until 2033 based on greenhouse gas emissions ...

11. Energy Storage. The IRA added standalone energy storage technology, which includes electrical energy storage property, thermal energy storage property and hydrogen energy storage property, to the list of property eligible for the Section 48 ITC. The Proposed Regulations provide clarity regarding the various types of energy storage property:

This new structure is designed to encourage competitive wages and job growth in the renewable energy sector and applies to most of the clean energy production credits as well as the advanced energy project credit ...

That 30% credit also applies to energy storage, meaning retrofits of batteries to solar arrays can benefit. The ITC is eligible for an additional 10% - 20% boost for projects in certain low-income communities and buildings. The ITC includes a 30% standalone credit for energy storage.

The law modifies the tax benefits for non-conventional renewable energy projects, including the value-added tax exemption, the accelerated depreciation rate and the income tax deduction. On July 10, 2021, Colombia enacted and published in the Official Gazette Law 2099, modifying the tax incentives applicable to non-conventional renewable energy ...

solar and, starting next year, battery storage, through at least 2034 o Expand the Energy Efficient Commercial Buildings Deduction so that the level of a building owner's deduction increases as the cost savings generated by energy efficiency investments increases, which will reward greater energy efficiency

Projects that meet domestic content minimums<sup>19</sup> are eligible for a 10 percentage point increase in value of the ITC (e.g. an additional 10% for a 30% ITC = 40%) or 10 percent increase in value of the PTC (e.g., an additional 0.3 ¢/kWh for a 2.75 ¢/kWh). The required percentage of manufactured products starts at 40% for all projects beginning
