

Does Jordan have a solar energy policy?

Jordan has implemented several policies to encourage the growth of solar energy in the country. In 2012, the government introduced a feed-in tariff system that offers a fixed rate for solar energy producers to sell their electricity to the grid.

How much solar energy does Jordan have in 2021?

In 2020, a solar energy project was put into operation with an installed capacity of 200 MW and following the opening of this facility the total installed capacity of solar energy in Jordan reached 1,831 MW in 2021, representing 75% of the total renewable energy capacity (NEPCO 2021, 2022; MoEnv 2020).

Could rooftop solar power be the future of energy in Jordan?

According to the IRENA report, rooftop solar installations could account for up to 1.4 GW of solar energy capacity in Jordan by 2030. This presents an opportunity for households and businesses in the country to generate their own electricity and reduce their reliance on the grid.

What is the outlook for solar energy in Jordan?

Looking ahead, the outlook for solar energy in Jordan is positive. According to a report by the International Renewable Energy Agency (IRENA), Jordan is expected to increase its solar energy capacity to 2.7 GW by 2023, up from 1.7 GW in 2020.

How much electricity does Jordan generate?

Imported natural gas and oil still account for approximately 76% of the electricity generated. Domestic resources, including renewable and traditional energy sources, represent 22% of the energy supply. However, the Jordanian government plans to generate 48.5% of electricity using local sources.

What are the risks of solar energy in Jordan?

However, there are also risks to this outlook, including the ongoing regional conflicts and the impact of the COVID-19 pandemic on the global economy. Currently, solar energy accounts for around 5% of Jordan's electricity generation capacity.

African SUN Holdings African SUN Holdings African SUN Holdings. What we do. Our Team comprises of proven on-the-ground expertise in the fields of operations, finance, management, and research within Africa, with international financial markets and carbon removal knowledge to profitably resolve real African issues:

HAMBURG, Germany -- Twenty-five years after Gerhard Knies conceived of powering Europe with the Sahara Desert's sun, the North Africa Solar project has grown into something considerably more than ...
