All BOS systems have identical connection points for solar photovoltaic (Solar PV) panels and AC loads. It takes hardly a few hours to set up the BOS system one for hybrid solar power, which makes them suitable for large scale installation and fast and easy maintenance. Thanks to its modular design, components can be adapted to any requirements.

The principle of the hybrid system considers the low-cost lead-acid battery as a long-term storage and backup, while the lithium battery handles the daily cycles. Through this combination it is possible to counteract typical shortcomings of ...
