

Can Angola achieve energy self-sufficiency?

Angola has everything it needs to achieve energy self-sufficiency through renewable sources - not only water, but also sun and wind. With these three natural resources, Angola could achieve the transition from oil and gas to renewable energies, and then boost its energy self-sufficiency.

What is Chevron New Energies & cabgoc doing in Angola?

Chevron New Energies and CABGOC are combining synergies in collaboration with the Angola Government to create opportunities and launch a regional "energy expansion" initiative focused on enabling sustainable economic growth, access to cleaner and reliable energy sources and environmental sustainability.

Should Angola invest in energy storage solutions?

With the ongoing solar projects under development in Angola with an installed capacity amounting to 500 MW, it is urgent to start thinking about efficient energy storage solutions. What structural challenges must be addressed for Angola to seize its renewable energy potential?

What will Azule energy do for Angola?

Combining two world-class businesses into one stronger team, Azule Energy will leverage synergies and high-quality assets, boosting activities in Angola and will have one of the largest portfolios of production, development and exploration opportunities in Sub-Saharan Africa.

Does Angola need solar energy?

Angola already boasts an impressive renewable energy component in its energy matrix, primarily derived from water resources. However, we recognise the potential for solar energy to complement this matrix and provide essential energy security.

Can Angola deploy pumped-storage hydroelectricity & hydrogen solutions?

Fernando Prioste, CEO of COBA Group, talks to The Energy Year about Angola's potential for deploying pumped-storage hydroelectricity and hydrogen solutions as it develops a robust energy industry and the central role of COBA Group in the country's power arena.
