In this case, the sales rep doesn't seem to have explained how solar panels work well. The 16 Qcells solar panels are rated to output 400 watts at peak, but that output is measured in DC electricity under standard test conditions (STC). Solar panels rarely operate at their full DC power output, but that doesn't mean anything is broken.

Monocrystalline solar panels are the most cost-effective option. Perovskite panels are more efficient and will be on the market soon . Thin film panels are the cheapest, most versatile choice. It's confusing enough trying to find solar panel prices, never mind choosing between the different types of solar panels to pick the right one for your home.
