

We are trading in - Urea Nitrogen UREA FERTILIZER 46% N GOST 2081-92 PRILLED Urea (PRILLED) GOST 2081-92 NITROGEN : 46.0% MIN (ON DRY BASIS) MOISTURE: 0.5% MAX BIURET %AGE BY WEIGHT: 1.0% MAX PARTICLE SIZE - (i) Material Passing through 2.8mm IS Sieve (Tyler Sieve 7) and retained on 1mm IS Sieve (Tyler Sieve 16) by weight i) To pass ...

Our Company; Our Offices; Management Team; Company Profile; Parent Company; Products. Fuel Products. Aviation Turbine Fuel Jet A1; Aviation Kerosene Colonial Grade 54 Jet Fuel JP 54; Virgin Oil D6; Diesel EN590; Gasoline 95; Automotive Gas Oil; D2 Diesel Gas Oil; 10 PPM Diesel; Petroleum Coke; 500 PPM Diesel; Gasoline 89 87 93; Naphtha; MAZUT ...

We are trading in - Naphtha The main uses of petroleum naphtha fall into the general areas of (1) precursor to gasoline and other liquid fuels, (2) solvents (diluent) for paints, (3) dry-cleaning solvents, (4) solvents for cutback ...

We are trading in - MAZUT Mazut is a heavy, low quality fuel oil, used in generating plants and similar applications. In the United States and Western Europe, mazut is blended or broken down, with the end product being diesel. ...

We are trading in - Fertilisers DAP and NPK Di-ammonium phosphate (DAP) fertiliser. It is the most popular phosphatic fertiliser because of its high nutrient content and good physical properties. The composition of DAP is 18% Nitrogen and P₂O₅ 46%. Within the same facility, Hindalco can also produce nitrogen phosphorus potassium (NPK) complexes as value-added ...

We are trading in - 10PPM Diesel ULSD is a D2 class diesel fuel material that results from a severe hydrofinishing process. This product is an Ultra-Low sulphur Diesel Fuel (ULSD) in line with EPA's new mandate of less than 15 ppm sulphur content, while improving environmental conditions by reducing unwanted emissions into the atmosphere. Diesel D2 has a high Cetane ...

We are trading in - LPG (Liquefied Petroleum Gas) LPG (Liquefied Petroleum Gas) is predominantly propane and butanes, either segregated or in various ratios and mixtures of each product. LPG is a by-product of crude oil production (Associated Gas) and a by-product of natural gas production (Non Associated Gas). It is also a by-product of the refinery process, ...

We are trading in - Base Oil N60 Base oils are used to manufacture products including lubricating greases, motor oil and metal processing fluids. Different products require different compositions and properties in the oil. One of the most important factors is the liquid's viscosity at various temperatures. Whether or not a crude oil is suitable to be made into a base oil is determined by ...

We are trading in - Light Cycle Oil Light Cycle Oil (LCO) is a diesel boiling range product from Fluid Catalytic Cracking Units (FCCUs). However, LCO is a poor diesel fuel blending component without further processing. Oil refining is an industrial process which involves separation, conversion and finishing. FCC centered refinery uses Fluid Catalytic Cracking Unit (FCCU) has ...

We are trading in - Type of Base Oil PARAFFINIC - Paraffinic Base Oils Group I SN 70, SN 100, SN 150, SN 200, SN 250, SN 500, SN 600, SN 650, BS 150 Group II 60 N, 100 N, 150 N, 220 N, 500 N, 600 N Group III 4 CSt, 6 CSt, 8 CSt NAPHTHENIC - Naphthenic Base Oils 40 Pale, 60 Pale, 100 Pale, 600 Pale, 1200 Pale, 2000 Pale, 2800 Pale LUBRICANTS - Specialty ...

We are trading in - 500 PPM Diesel Quest Petroleum Diesel 500 PPM is a premium quality, standard grade diesel for all automotive type high speed diesel engines in both stationary and mobile services. This diesel is a highly refined hydrocarbon fuel formulated with additive technology which provides improved power and performance with the potential for reduced fuel ...

ASPO ENERGY is a trading company which specialized in fuel, oil, gas and energy products trading across the globe. Saturday, October 26, 2024 - 10:38:49 AM. Top Links: Bitumen Products; Base Oil N70; Base Oil SN 350; Urea Fertilizer; Bitument 150 Grade; Aviation Kerosene Colonial Grade 54 Jet Fuel JP 54; 6.394 11.

We are trading in - Light Crude Oil Light Crude oil is liquid petroleum that has low density and that flows freely at room temperature. It has low viscosity, low specific gravity and high API gravity due to the presence of a high proportion of light hydrocarbon fractions. It generally has a low wax content as well. On the other hand, heavy crude oil or extra heavy crude oil is any type of ...

Find company research, competitor information, contact details & financial data for ASPO ENERGY LTD of Larnaca. Get the latest business insights from Dun & Bradstreet.

Our Company; Our Offices; Management Team; Company Profile; Parent Company; Products. Fuel Products. Aviation Turbine Fuel Jet A1; Aviation Kerosene Colonial Grade 54 Jet Fuel JP ...

ASPO Energy Ltd | 443 followers on LinkedIn. Trading in Fuel, Oil & Gas | ASPO ENERGY is a trading company which specialized in fuel, oil, gas, and energy products trading across...

We are trading in - Naphtha The main uses of petroleum naphtha fall into the general areas of (1) precursor to gasoline and other liquid fuels, (2) solvents (diluent) for paints, (3) dry-cleaning solvents, (4) solvents for cutback asphalts, (5) solvents in rubber industry, and (6) solvents for industrial extraction processes. The key difference between naphtha and gasoline is that the ...

We are trading in - Base Oil N70 Pure Performance 70N is a high purity, low viscosity paraffinic oil produced from a high-pressure hydrocracking and hydro-dewaxing process that removes virtually all metals, sulfur, and

nitrogen from the feedstock. Customers purchase Pure Performance 70N for a wide variety of uses, including use as a process oil, ATF formulations, ...

ASPO ENERGY has diversified its business to trading in a wide spectrum of commodity products including crude oil, refined oil products, petrochemicals, natural gas, LNG, power, coal, carbon emissions, freight, iron ore, base metals ...

We are trading in - Base Oil SN 650 This means that crude oil is heated in order that various distillates can be separated from one another. It has been solvent refined, dewaxed, and hydrogen treated to take out impurities. This oil has no ...

We are trading in - Virgin Oil D6 D6 is a type of residual fuel, mainly used in power plants and larger ships. The fuel requires to be preheated before it can be used. It is not possible to use it in smaller engines or vessels/vehicles where it is not possible to pre-heat it. D6 is its name in the USA. In other parts of the world it has other names. Residual means the material remaining ...

We are trading in - Fertilisers DAP and NPK Di-ammonium phosphate (DAP) fertiliser. It is the most popular phosphatic fertiliser because of its high nutrient content and good physical properties. The composition of DAP is 18% Nitrogen ...

aspo energy is a trading company which specialized in fuel, oil, gas and energy product trading across the globe. Oil and Gas has been recognized by our customers and partners for our value-adding approach in trading of fuel, Oil, ...

Powering the future with LNG (Liquefied Natural Gas)! ?? A cleaner, efficient energy solution for a sustainable tomorrow. #LNG #CleanEnergy #Sustainability

We are trading in - MAZUT Mazut is a heavy, low quality fuel oil, used in generating plants and similar applications. In the United States and Western Europe, mazut is blended or broken down, with the end product being diesel. Mazut-100 is a fuel oil that is manufactured to GOST specifications, for example GOST 10585-99. Mazut is almost exclusively manufactured in the ...

We are trading in - Bitument 150 Oxidized Bitumen 150/5 is produced by either Continuous or Staggered Blowing Process. Heated Penetration Grade Bitumen under controlled environment is blown with air which controls the Oil Content in the Bitumen while it oxidized. The different grades for suited applications produced are designated by two numbers to indicate the mid-points of ...

We are trading in - Base Oil SN 650 This means that crude oil is heated in order that various distillates can be

separated from one another. It has been solvent refined, dewaxed, and hydrogen treated to take out impurities. This oil has no impurities or compounds that can have an adverse effect on the quality of the oil. Uses of SN 650 Base oil Group I according to the ...

We are trading in - Automotive Gas Oil Automotive Gas oil, also known as diesel, is generated from crude distillation process and is used to efficiently power internal combustion diesel engines. Our diesel conforms to the specifications from the Department of Petroleum Resources (DPR). Automotive Gas Oil, or AGO, is the name given to fuel intended for use in road vehicles ...
