

What is Belgium's energy supply?

In 2020, fossil fuels (mainly oil and natural gas) accounted for 71% of its energy supply. Most fossil fuel demand comes from industry and transport, but Belgium's buildings also have a notable demand for gas, while oil covered 33% of residential building demand in 2020.

What is Belgium's energy policy?

Belgium's energy policy is focused on transitioning to a low-carbon economy while ensuring security of supply, lowering costs for consumers, increasing market competition and continuing integration with the European energy system.

How many suppliers dominated Belgium's Electricity Market in 2019?

In 2019, just one supplier had a 72% market share at the wholesale level, while just four suppliers dominated Belgium's retail electricity markets. More effort is needed to remove barriers to competition and ensure that new companies and innovative services can enter the market.

Does Belgium have a future for offshore wind?

Progress on renewable energy has been especially pronounced for offshore wind. In 2021, Belgium had the sixth-highest offshore wind capacity in the world and is planning for a major expansion of offshore wind deployment. Belgium faces notable challenges as it continues to push for its energy transition.

When will the VIP NCG Oberkappel be implemented?

The TSOs will thus establish the VIP NCG Oberkappel on the German side of said interconnection point on 1 March 2019. This implementation date has been communicated to Gas Connect Austria and the BNetzA. Further details regarding the implementation of this VIP (e.g. EIC code) are available under the download section.

How is Belgium preparing for a gas transition?

Belgium is also working with France, Germany and the Netherlands to ensure that security of gas supply is maintained as production from the Groningen gas field is phased out. Since the IEA's last energy policy review in 2016, Belgium has made progress on its energy transition.

Sigenergy has entered into a landmark agreement with Trakia MT Ltd., a leader in Bulgaria's solar energy sector, to supply an additional 10 MWh of cutting-edge energy storage solutions, bringing their total combined storage capacity to 20 MWh. [Learn More](#). Sep 10, 2024

BRUSSELS | The Belgian energy landscape will undergo an immense transformation over the next 25 years, but the outlook is nevertheless positive. By 2050, energy consumption from buildings, transport, and industry will fall by around 40%. These efficiency gains will be mainly driven by increasing electrification. Although molecules will remain vital for some ...
