

Bill of quantities for solar system U S Virgin Islands

What is the USVI solar+ financing pilot program?

The USVI Solar+Financing (SPF) Pilot Program is a loan program for residential solar PV and Battery systems being offered through the Virgin Islands Energy Office and the VI Water and Power Authority. Through on-bill repayment this program allows property owners to pay for renewable energy systems through their monthly utility bill.

Why is solar power important in the USVI?

The USVI's abundant solar resource, with a global horizontal irradiation of nearly 6 kWh/square meter-day, makes solar power economically attractive in the USVI.

What is the cost of electricity in the USVI?

The electricity rates in the USVI are \$0.47 per kilowatt-hour (kWh). This is higher than the Caribbean regional average of \$0.33/kWh.

How does oil affect the cost of electricity in the USVI?

The USVI, like many island nations, is heavily reliant on fossil fuels for electricity generation. This reliance leaves the USVI vulnerable to global oil price fluctuations, which directly impact the cost of electricity. Assumes an average electricity price of \$0.50/kWh and consumption of 767.4 gigawatt-hours (GWh).

What does USVI Act 7075 entail?

In 2009, the USVI passed Act 7075--an energy policy that focuses on reducing fuel imports, expanding fuel diversity, and increasing energy self-sufficiency. The Act specified several provisions, including: Mandatory installation of energy-efficient solar water heating systems on all new construction and government buildings by 2020.

How much energy can St Croix generate from biomass?

St. Croix has a moderate potential to generate 3 MW to 5 MW of energy from biomass due to the majority of the island being covered with forest. Landfill gas also has an expected capacity of about the same.

The information included in the bill of quantities makes this schedule far more accurate than it would be without a bill of materials. Project management software helps you take the information from the bill of quantities and use it to build an actionable construction project plan.

project name : supply and installation of a complete solar system with panels at sandringham campus nhls
modderfontein bill of quantities : grid-tied, carport solar pv installation it & hr section 1 item description unit
