

What makes opdenenergy a leading renewable IPP in Chile?

With the entry into operation of this farm, Opdenenergy consolidates its position as one of the leading renewable IPPs in Chile with 171MW in operation and a pipeline of more than 1GW of additional projects under development.

What is opdenenergy's biggest asset in Chile?

Sol de los Andes is Opdenenergy's largest asset in Chile and the second large-scale project in the country, together with La Estrella wind farm in the O'Higgins Region. La Estrella, which was inaugurated with the authorities of the Ministry of Energy in September 2021, has an installed capacity of 50MW and produces 100GWh/year.

How does Chile benefit from solar energy?

The country benefits from consistently strong winds in mountainous region of Patagonia and some of the world's highest levels of solar radiation in the Atacama Desert. This predictable supply of wind and solar energy has led the Chilean government to estimate that 13% of the world's green hydrogen will be produced within its borders.

Is there an alternative to solar energy in Chile?

Chile has begun to explore an alternative. Both Cerro Dominador and the Alba Project are powered by so-called solar salts, extracted from the Atacama Desert, composed of potassium nitrate and sodium nitrate. When melted and kept in a liquid state, they allow energy to be stored.

Will Chile achieve net-zero emissions by 2050?

Last December, Chile's centre-right government published the country's first energy transition strategy, which provided targets for achieving net-zero emissions by 2050, including accelerating solar, wind and geothermal energy across the country.

What is the energy partnership between Chile and Germany?

One of Chile's most active renewable energy partnerships is with Germany. Under the Energy Partnership Chile-Germany, both countries share knowledge, organise training sessions and host facilitate renewable energy agreements between business leaders and policymakers.
