

What is COGEN Europe?

COGEN Europe is the European Association for the Promotion of Cogeneration. We work with the EU institutions and various stakeholders to promote policies and legislation that recognise the valuable role cogeneration technologies have to play in the framework of efforts to boost energy efficiency and reduce emissions.

Where can I read the CWC report - Global cogeneration market overview?

Read the CWC Report: Global Cogeneration Market Overview (2nd Edition - December 2023) The main findings of the CWC's 2nd Global Cogeneration Market Report were presented during a live webinar on 18 December 2023. You can watch the webinar recording on the CWC's YouTube channel.

What is CWC's global cogeneration market overview?

The second edition of CWC's Global Cogeneration Market Overview was produced for CWC by Chalco Energy. It describes the state of the cogeneration market around the world using data published by the International Energy Agency (IEA) in 2022, complemented by data published by Eurostat (the statistical office of the European Union) in 2023.

What does the cogeneration sector do?

**OUR VISION** The cogeneration sector is committed to creating a resilient, decentralised, carbon neutral European energy system by 2050, with cogeneration as its backbone: 3 Building a robust evidence-base demonstrating the benefits of cogeneration. Using the expertise of our membership. Establishing strong coalitions and partnerships.

What is the future of cogeneration technology?

Demand for cogeneration technologies is expected to continue growing in Asia (especially in China and India) as well as in South America and North America (notably thanks to financial incentives offered by the US Government under the Inflation Reduction Act of 2022).

By Jean Clarys "Africa is undergoing significant change, it has evolved greatly (...) More than just a software update, we propose to install a new software together, adapted to the ongoing transformations," said Macky Sall, then President of Senegal and Chairperson of the African Union (AU), calling for a "fresh start" during the sixth AU-EU summit [...]

Clarke Energy USA specialize in gas engine power stations and combined heat and power (CHP) technology alongside renewable natural gas (RNG) solutions for gas grid injection. We are expanding this offering to incorporate additional ...

Biofuels and waste account for 18.1% of the fuel mix in Africa, 19.3% in Europe, 72.1% in South America and 82.7% in India (according to the best available data). As well as looking at the current situation, the report

...

Clarke Energy USA specialize in gas engine power stations and combined heat and power (CHP) technology alongside renewable natural gas (RNG) solutions for gas grid injection. We are expanding this offering to incorporate additional and complimentary renewable energy generation and storage technologies as hybrids or microgrids.. Clarke Energy is an authorized distributor ...

COGEN Europe, the European Association for the Promotion of Cogeneration, is the cross-sectoral voice of the cogeneration industry. We have 56 members: 17 national associations ...

Cogeneration, or combined heat and power (CHP), is a highly efficient method of generating electricity and useful heat from a single fuel source. In South Africa, where energy demands are high and the need for sustainable solutions is paramount, implementing small steam turbines for Mini Cogen systems presents an excellent opportunity.

COGEN Europe seeks to influence EU policies and legislation with a special focus on energy, climate and environmental issues. We share our policy positions with policymakers, stakeholders and the wider public via our position papers and other publications. Our papers reflect the consensus view of our members spanning the entire energy supply chain.

COGEN Europe has built up an extensive network of partners in Brussels and beyond, including numerous European associations with whom we share information and develop joint activities. ...

Danone is installing a 5-MW combined heat and power (CHP) solution and microgrid controller at its dairy manufacturing plant in Boksburg, Gauteng, South Africa. The facility produces a variety of ...

The socio-economic and infrastructural development of a developing country can be largely attributed to its electricity generation, transmission and utilization [1], [2], [3], [4] is therefore unsurprising that South Africa being Africa's largest consumer of energy is also among the most developed nations on the African continent [5].South Africa is located on the ...

Press Release - 5 January 2023. In the framework of Germany's assistance to Ukraine, SOKRATHERM GmbH (a member of B.KWK - the German CHP Association, which is a member of COGEN Europe) has won a contract to provide 5 mobile cogeneration units to the city of Kharkiv. The first two mobile GG 70 VR compact CHP units have already arrived in Kharkiv ...

2 &#0183; South Africa - Apartheid, Colonization, Freedom: The prehistory and history of South Africa span nearly the entire known existence of human beings and their ancestors--some three million years or more--and include the wandering of small bands of hominins through the savanna, the inception of herding and farming as ways of life, and the construction of large ...

As part of the European Green Deal, COGEN Europe\* organised its annual and digital conference on 12 and 13 October. Kamila Waciega, Director of energy and climate issues at Veolia's Public Affairs Department, presented the association's and Veolia's cogeneration, district heating, and waste heat solutions to achieve a 55% reduction in CO<sub>2</sub> ...

GLOBAL COGENERATION MARKET OVERVIEW 2nd Edition (December 2023) ... markets, namely South America and Africa (ex: no data on CHP heat output) ... Europe 693TWh Electricity produced by CHP plants in 2020: &#216;CHP share in total electricity generation

Swaziland's installed capacity is mostly hydro-powered, with the bulk (90%) of its electricity imported from South Africa. As South Africa's own demand for power has begun to outstrip its generation capacity, Swaziland needs to expand its own generation capacity. Cogeneration is one of the options that are currently being evaluated.

Marelli Motori employs around 500 people and operates an extensive manufacturing facility in Italy with own subsidiaries in the United States, Germany, South Africa and Malaysia and has an extended sales, distribution, and service network across four continents, supplying its technologically advanced products in more than 120 countries.

COGEN Europe's Annual Conference brings together companies and organisations with an interest in cogeneration technologies and applications. The Conference programme includes a series of panel sessions looking forward to the challenges and opportunities that the cogeneration sector will face during the next five years, under the incoming European Commission which is ...

COGEN Europe, the European Association for the Promotion of Cogeneration, today announced that Alex Marshall, Group Marketing and Compliance Director for Clarke Energy, has joined its Executive Committee. Clarke Energy join the committee as a company committed to making climate neutrality a reality by 2050. Clarke Energy now operates in 5 ...

The Role of Cogeneration in Europe's Energy Transition Enabling an Efficient Pathway to Net Zero The next five years will be crucial for building a prosperous, competitive and sustainable Europe. Energy is vital for all Europeans and the economy. Our homes, schools, hospitals, businesses and industry need secure access to electricity and heat that are both

Central European Time and South Africa Time Converter Calculator, Central European Time and South Africa Time Conversion Table. TIMEBIE &#183; US Time Zones &#183; Canada &#183; Europe &#183; Asia &#183; Middle East &#183; Australia &#183; Africa &#183; Latin America &#183; Russia &#183; Search Time Zone &#183; Multiple Time Zones &#183; Sun Rise Set &#183; Moon Rise Set &#183; Time Calculation ...

News by Cogen EUROPE. COGEN World Coalition publishes 1st Global Cogeneration Market Report. ...

Biofuels and waste account for 18.1% of the fuel mix in Africa, 19.3% in Europe, 72.1% in South America and 82.7% in India (according to ...

Cogeneration simultaneously produces electricity and thermal energy from the same energy source, which significantly enhances the energy efficiency up to 80% as compared to 50% efficiency for separate heat and power generation [6] generation is an environmentally sustainable process that reduces greenhouse gas emissions and minimizes fuel requirements, ...

Cogeneration, or combined heat and power (CHP), is a highly efficient method of generating electricity and useful heat from a single fuel source. In South Africa, where energy demands are high and the need for sustainable ...

COGEN Europe, the European Association for the Promotion of Cogeneration, is the cross-sectoral voice of the cogeneration industry. Its mission is to work with EU institutions and ...

EM-Power Europe Munich, June 9-11, 2021 Munich/Pforzheim, January 26, 2021 - Our energy supply needs to become flexible, clean and cost-effective. This requires the coupling of the electricity, heat and transportation sectors. Sustainable combined heat and power (CHP) - or cogeneration - is a key component of sector coupling and, in addition to other renewable

Newcastle Cogeneration Newcastle, South Africa. PROJECT CATEGORY. Engineer, Procure and Construct. PROJECT SUMMARY. The Newcastle Cogeneration (NewCogen) power plant utilizes methane-rich gas to generate electric power by means of a combination of gas turbines and reciprocating engines. The power generated by the power plant is evacuated to the ...

COGEN Europe, the European Association for the Promotion of Cogeneration, is proud to welcome the Cogen Ukraine Decarbonization Association as a new member (as from 1 December 2023). ... The farm at Suchohrdly (approximately 40km south west of Brno) meets its own energy needs by producing biogas from a liquid slurry containing pig manure ...

COGEN Europe is the European Association for the Promotion of Cogeneration. We work with the EU institutions and various stakeholders to promote policies and legislation that recognise the valuable role cogeneration technologies ...

Johannesburg, South Africa, 12 September 2023. Moshesh Cogeneration, a special purpose vehicle owned by Moshesh Partners and backed by Rand Merchant Bank, has selected Clarke Energy to deliver a full turnkey CHP facility and microgrid controller to Danone.

South Africa, an upper-middle-income country, holds the rank of the third-largest economy in Africa. Among the European Union's 10 bilateral strategic partnerships with nations worldwide, South Africa is the sole African partner. As South Africa's foremost trading ally and the primary source of direct foreign investments,

the EU is dedicated to ...

Founder at GX Group &#183; Entrepreneur, growth specialist, strategy specialist and innovator with more than 30 years experience in the telecom and energy sectors in Africa with extensive experience in multiple disciplines, possessing the necessary skills such as leadership qualities, business acumen, management skills and technical expertise. In all of the roles which I fulfilled, ...
