

Hey all! I've been having great fun testing CI and submitting bug reports to help out the devs, but this one's been something I've seen other people aren't having and I want help figuring out the process I went through that triggered it. Long story short, I'm in late fall (grabbed cows late this time) and just handed over bronze milk to the last turtle to access solar orb spots ...

Overview []. All production process will go through first in first out queue except dehydrator, fish pond. and insect house that will process all inputs simultaneously.; All production can't process different type of input at the same time except bee house and dehydrator.; Only solar panel and tap don't require any inputs. Tap needs to be attached to mature wild trees such as Pine, Oak, ...
