

# CuraÃ§ao projecte energy condenser setup

What is the energy condenser added by ProjectE?

This page is about the Energy Condenser added by ProjectE. For other uses, see Energy Condenser. The Energy Condenser is a machine added by ProjectE, based off the Energy Condenser added by Equivalent Exchange 2. The Energy Condenser performs three functions.

Can a power flower feed a condenser?

Yup. A power flower is the most efficient way of feeding a Condenser. If you have only one condenser, you could stack power flowers. But that's less efficient than just making another separate power flower

What is the energy condenser?

Community content is available under CC BY-NC-SA unless otherwise noted. This page is about the Energy Condenser added by ProjectE. For other uses, see Energy Condenser. The Energy Condenser is a machine added by ProjectE, based off the Energy Condenser added by Equivalent Exchange 2.

How do condensers make Mobius fuel?

One condenser made red matter, the other one made mobius fuel. The fuel got into the collectors via router and would become aeternalis fuel. The aeternalis fuel then routed back to the condensers, keeping a supply of mobius fuel at all times and producing a stupid amount of EMC.

The Energy Condenser is a very useful object added by the Equivalent Exchange mod. It behaves in a way similar to the Transmutation Tablet, but is able to be made automatic. You put one target item in the spot on the upper left hand ...

One condenser made red matter, the other one made mobius fuel. The fuel got into the collectors via router and would become aeternalis fuel. The aeternalis fuel then routed back to the condensers, keeping a supply of mobius fuel at all times and producing a stupid amount of EMC.

The Energy Condenser duplicates items with EMC values using other items with EMC values. The top-left slot is where the item to be duplicated is placed. Then, any item put in its other 91 Inventory slots will be converted into the target item, should there be enough EMC. Condensers can also use EMC created from adjacent Antimatter Relays and Energy Collectors. If there are ...

Cartes fleurs A Power Flower is an arrangement of Energy Collectors (of any size) and Antimatter Relays (of any model) that feed into a central Energy Condenser, producing an unlimited amount of EMC to convert into materials. The arrangement of the collectors and relays takes on the shape of a flower, hence the term "Power Flower". On an SMP server, leaving this Power Flower ...

Energy Collector MK1 is a tier 1 passive EMC generator added by ProjectE, based off the Energy Collector

# Curação projecte energy condenser setup

added by Equivalent Exchange 2. It passively generates 4 EMC every 1 second up to a maximum of 10,000 EMC depending on the highest light level. When placed adjacent to an Energy Condenser MK1, Energy Condenser MK2, Anti-Matter Relay MK1, Anti-Matter Relay ...

(Energy Condenser),[PE] (ProjectE),MOD,Minecraft()MOD() ...

The Energy condenser takes all emc-able items and converts them into a target item. The idea being that you can turn all those bones and zombie flesh into nether stars or some other high ...

The MK1 has one buffer for all items. Meaning the items you input and the items it outputs goes into the same inventory. This could be bad because it can clog the system up if you take high emc items to make low emc items.

Power flowers generate emc from effectively nothing. The item you're condensing EMC into is entirely up to you. Diamond blocks, emerald blocks and stuff like that are just convenient because they're really dense in terms of EMC, so you don't have to move as many items from the condenser to the table.

(Energy Condenser),[PE] (ProjectE),MOD,Minecraft()MOD()MOD?

Energy Collector MK3 is a tier 3 passive EMC generator added by ProjectE, based off the Collector MK3 added by Equivalent Exchange 2. In strong lighting, or if placed in the nether, it will generate a passive 40 EMC per second up to a maximum of 60,000 EMC. When placed adjacent to a Energy Condenser MK1, Energy Condenser MK2, Energy Condenser MK3, Anti-Matter ...

[ATM7 To the sky] Is it worth it to make an energy collector setup with an energy condenser from ProjectE? Title. I've seen people only use the condensers so far, but I would like to know if it would be worth to set up an energy collector for some emc, despite there not being a lot of items that are emc-able in this pack.

You can have multiple power flowers shooting out some high emc item into a main condenser. And a dm ped with a watch of flowing time helps too.

A standard setup would be drawer locked to Sky Stone Dust. Input Silicon into the drawer, pull out Sky Stone Dust into an emc condenser targeting Silicon, pull out silicon from condenser, insert back into the drawer, rinse and repeat. This gives you a net income of 96 emc per "pull". So, your emc generation depends on how fast you can pull out ...

The basic idea behind a Power Flower is to use Energy Collectors (which turn light into EMC) to produce Diamonds (or another suitable-value EMC item) in an Energy Condenser. A Power Flower is a complex arrangement of these devices (Collectors, Relays, and Condensers) that is both expandable and will produce diamonds at optimal or close-to ...

# CuraÃ§ao projecte energy condenser setup

The BEST emc flower setup in PROJECTE minecraft mod #shorts #minecraft #mods #tutorial In this video, I'll guide you through creating the ultimate EMC flowe...

High Yield Energy Condenser Layout. This is a very advanced method. Note that it could be advisable to do this in an isolated spot, or one that is protected. Materials Needed. ... Each individual set up will have its own time requirements according to pipe length, Energy Collectors used, where the Filter is, and how many Condensers are in front ...

You can get an energy condenser and repair talisman before the chaos dragon and stuff like the transmutation table is gated behind chaos shards from the chaos dragon, meaning you only those things when you're almost done with the pack and just want to do a few remaining quests here and there. ... I think ProjectE is inherently flawed as a ...

Since you have worked a furnace into the devices, you find that the EMC is infused into specific items placed in the input slots, transmuting them into higher-powered materials by collecting ...

I just prefer using a closed loop system, MK2 to magma crucibles to fluid dictionary because it is much simpler to setup, can be easily scaled up to your needs and is not a plant, plants are either slow or one of the laggiest things in Minecraft. The singularities you make with EMC from MK2 energy condensers are made extremely fast.

Anti-matter relays can connect to the collectors to funnel the EMC somewhere. They also add bonus EMC to each source that transfers EMC through them. You can connect them to an ...

PLEASE READ DESCRIPTION! LIKE/COMMENT/SUBSCRIBE! FTB Sky Adventures: FTB Sky Adventures is a large 1.12 modpack with a mix of tech and magic mods using...

The Energy Condenser is a very useful object added by the Equivalent Exchange mod. It behaves in a way similar to the Transmutation Tablet, but is able to be made automatic. You put one target item in the spot on the upper left hand corner, and if the Condenser is hooked up to Energy Collectors, whether through Antimatter Relays or just the Energy Collector is next to it, the ...

Then make a power flower and slowly realize that ProjectE kills the fun bits of Minecraft. ... You can connect them to an Energy Condenser to convert the EMC to a specific item, like diamond. Reply reply Top 1% Rank by size . More posts you may like r/feedthebeast. r/feedthebeast ...

The best in projectE alone is just collectors eith relays around an energy condenser with many watch of flowing time around. If you also have Project EX stuff is different as you can import items directly into EMC

## CuraÃ§ao projecte energy condenser setup

Energy Condenser Setup . I have just started trying to make an automated rainbow generator to get balanced clay, but I can't figure out the best way to set up the energy condensers to create the items. I used a tutorial in the comments of this post, but there is nothing that states how to set up the energy condensers. Can somebody help me? ...

AFAIK the most efficient design is an energy condenser surrounded by relays which are in turn completely covered by collectors. ... Controversial. Old. Q& A. acun1994 o Power Flowers are the best in terms of footprint and ease of setup. It's also fully passive, so that's a bonus. There are slightly faster ways of generating EMC, for example ...

Cartes fleurs A Power Flower is an arrangement of Energy Collectors (of any size) and Antimatter Relays (of any model) that feed into a central Energy Condenser, producing an unlimited amount of EMC to convert into materials. ...

I'm having problems with the condenser set up. I have it all set up right (checked with a video and have use project e before) but it still doesn't seem to produce any item. really just wonder if this is some thing that the modpack does to help level the game out or what?

ProjectE just gives end game setups. The Energy Condenser is a Duper that doesn't feel like a complete cheat unlike Parabox. ... This setup fills up a maxed out Relay in around 20 minutes. I would need an item with 10m EMC left in there for at least 13 ...

So I'm playing with Project EX and I got the Bonsai Power Flower Pot or whatever the fuck it's called. And it's putting EMC in my network. How do I use the EMC in the network with my condenser. I've tried using the EMC link, relays, both, and looking in the config, nothing works. I can't find anything on google.

The basic idea behind a Power Flower is to use Energy Collectors (which turn light into EMC) to produce Diamonds (or another suitable-value EMC item) in an Energy Condenser. A Power ...
