Renewable energy is the driving force behind progress, including in Curaçao. Today, 30% of the power consumed on the island is generated by wind. And we're keeping the energy flowing, as we're planning to build another five wind turbines over the course of 2024. Projects in Curaçao

In Curaçao komt nu ongeveer 30% van de elektriciteitsproductie uit hernieuwbare energiebronnen. Er zijn 3 windparken, samen 46,5 MW en goed voor 25% van de elektriciteitsproductie. Daarnaast is er ongeveer 23 MW aan zonnepanelen op daken geïnstalleerd, waar zo'n 5% van de elektriciteitsproductie vandaan komt.

EnergyTech is focused on the mission critical and large-scale energy users and their sustainability and resiliency goals. These include the commercial and industrial sectors, as well as the military, universities, data centers and microgrids. The C& I sectors together account for close to 30 percent of greenhouse gas emissions in the U.S.

Through efficiency gains, efficient use of resources and a reduced dependence on petroleum fuel imports the competitive position of Curaçao will be strengthened. This policy document consists of three parts. Part 1 provides the focus and main themes of the National Energy Policy. It also defines the targets to be realized.
