

Does France have an ecological transition plan?

To expedite the process of curbing the ecological footprint, France has launched the Ecological Transition Plan (ETP). However, environmental programs in France are orchestrated at the national and regional levels, which tends to diminish the heterogeneity of territorial dynamics.

Are all French territories in a state of ecological deficit?

Overall, results at the sub-national level reveal that not all French territories are in a state of ecological deficit. Specifically, 73% of the territories are classified as ecological reserves, while only 27% are experiencing an ecological deficit.

What is the French Southern Territories nature reserve?

In 2006, the French Southern Territories Nature Reserve was created around the Crozet archipelago and the Kerguelen, Saint-Paul and Amsterdam islands. This reserve, which by 2022 will cover an area of 1.6 million km², is one of the largest marine protected areas in the world and has been a UNESCO World Heritage Site since 2019.

Is a French energy policy localism a risk-and-error transcalar process?

The paper bears witness to the emergence of a French energy policy localism. It presents a sample of significant local rural experiences in the climate energy domain in rural France. These experiences are risky, trial-and-error transcalar processes. They amount to a different way of doing energy policy.

Is there a high-resolution ecological footprint for all French territories?

This study for the first time presents a high-resolution ecological footprint for all French territories using a spatially-nested approach. This exhibits a significant stride in establishing the foundation for standardized benchmarking considering the inherent attributes of various territories.
