

Does Hellenic Petroleum have a solar park in Greece?

Hellenic Petroleum is one of the largest oil companies in the Balkans but claims to be undergoing a transformation into clean energy. It has installed the largest solar park in Greece and also hints that it may add battery storage too.

Does Greece have solar power?

The country's relatively high level of solar insolation is an advantage boosting the effectiveness of solar panels; within Europe, Greece receives 50% more solar irradiation than Germany. In 2022, solar power accounted for 12.6% of total electricity generation in Greece, up from 0.3% in 2010 and less than 0.1% in 2000.

Can Greece make its energy mix greener?

The company, which owns and operates the Greek electrical transmission system connecting power plants with customers, says the achievement will open the door to making its energy mix greener in coming years. Greece relies on a range of sources for electricity, with no one source accounting for more than 50%.

Is Greece ready for a new 'energy community'?

Greece is a frontrunner in establishing a new type of civil cooperative, the "energy community" (Law 4513/2018), including most of the criteria in the EU directives (effective control, open and voluntary participation, local proximity, etc.).

What is the penetration rate of smart meter in Greece?

Low smart meter penetration: Due to legal proceedings on a specific case with a Distribution System Operator (HEDNO), the installation of smart meters in Greece stalled and is only at a penetration rate of 6%. Although, this will be resolved with financial support from the European Investment Bank.

Thessaly, Greece. Our solar project Enipeas is a cluster of two sites for a total capacity of 560MW located in Thessaly region. See project . Wellington solar. 200 MW. New South Wales, AUS. This project consists of a 200MWdc solar farm ...
