

Will AMEA power install a solar PV project in the Ivory Coast?

According to AMEA Power, the installation will be the first solar independent power project in the Ivory Coast. Image: AMEA Power. Middle Eastern renewable energy company AMEA Power has signed an agreement with the Ivory Coast government for a solar PV project.

Will Ivory Coast get a 52 MW solar plant?

The Ivory Coast government has signed an agreement with infrastructure investor PFO Africa for the financing, construction and operation of a 52 MW solar plant. The project has been billed as the country's largest to date.

When will Ivory Coast's solar power plants be built?

The minister said that contracts are currently under review for the construction of other solar power plants, with a cumulative capacity of 600 MW. Commissioning of these projects will take place in 2025 and 2026. Coulibaly said the Ivory Coast's installed solar capacity currently stands at 2,907 MW.

How much solar power does Ivory Coast have in 2023?

Ivorian Energy Minister Mamadou Sangafoua Coulibaly has also revealed plans to expand the capacity of the Boundiali plant to 80 MW. According to the International Renewable Energy Agency (IRENA), Ivory Coast had 46 MW of installed solar at the end of 2023. This content is protected by copyright and may not be reused.

Where is the first solar power project in Ivory Coast?

The project will be the first solar Independent Power Project (IPP) in Ivory Coast and will be located at the city of Bondoukou in the north-eastern region of Gontougo, located 420 km northeast of Abidjan.

How much energy does the Ivory Coast have?

It currently has a capacity of 37.5 MW, but Coulibaly says this is set to expand to 80 MW, with financing for the expansion already approved by the Council of Ministers. The Ivory Coast has vowed to reduce its greenhouse gas emissions by 32% and increase the share of renewable energy in its energy mix to more than 40% by 2030.
