

Energized by these challenges, Enedo began designing a new power source capable of meeting the demands of this new market. Thanks to our tacit knowledge and experience to deep dive into the increasingly demanding technical requirements, Enedo was able to develop the new high-power LED drivers and successfully pass severe qualification tests ...

inverters are modular and may be integrated into the same cabinet as the Enedo DC power system for redundant, fault tolerant performance when long life and long battery service are required. Key features. Supports nominal battery voltages of 24, 48, 60, 110, 125, 220 & 230 VDC;

Industrial applications call for the highest expertise in power supply development, with strict design requirements and industry-specific design standards, rules and regulations. Enedo's highly efficient green standard and customized power conversion solutions save energy and lower operating costs while providing the highest reliability.

With over 40 years of experience in designing and manufacturing highly reliable power conversion solutions that deliver lower energy consumption, we strive for optimal result and success together with our clients. Solving our clients" ...

"Enedo, through the strategic acquisitions of ROAL Electronics in 2013, and PowerNet International Oy in 2018, is re-imagining the future of power electronics design with a focus on purpose-built, value-added products and solutions that address the ever-changing needs of our customers for today and into the future.

2U inverters are intended for stand-alone DC to AC conversion to provide backup power for AC loads. Key features. Supports nominal battery voltages of 48 & 60 VDC; Stand-alone applications; High efficiency to 90%; ... Enedo Headquarters Martinkyl&#228;ntie 43 01720 Vantaa Finland. Tel: +358 9 478 466 info@enedopower . Solutions by ...

Enedo, established in 1975, specializes in high-quality power supply and conversion solutions for industries like rail, medical, LED lighting, and military. With a global presence and over 80 years of combined expertise, Enedo offers innovative, sustainable, and reliable products, tailored to meet specific industry requirements.

Enedo is an international company that designs and manufactures custom and standard DC power systems, AC/DC power supplies and LED drivers for a wide range of demanding industrial applications including telecommunications, industrial, medical, lighting, utility, railway and military.

Enedo Configurable Power Supplies, RCB600 The RCB600 series of modular and configurable AC-DC power supplies provides high performance and wide flexibility in an extremely compact package. The series is capable of a steady 600W from a 3 X 5 X 1.6" package, distributed among four independent and isolated slots where any of the six available ...

The RCB600 is a modular, configurable multi-output power solution offering unrivaled performance and flexibility. It is capable of delivering 600W from a 3 x 5.6 x 1.6" (78 x 144 x 41mm) package, and is one of the smallest commercially ...

Enedo power supply solutions are suitable for electric, diesel, diesel-electric, hybrid, gas turbine and fuel cell-electric locomotives. Rail approved power solutions. Find the perfect solution for your needs and request an offer. ...

The DDP600 AC/DC front-fan power supplies provide a steady 600 W of regulated DC power through the extended 85 to 305 VAC input voltage range, all in a 4.2 x 8.1 x 1.6" (107 x 206 x 41mm) form factor. ... Enedo Headquarters Martinkyläntie 43 01720 Vantaa Finland. Tel: +358 9 478 466 info@enedopower . Solutions by Industry. Contact Us;

The operating voltage range is 277/347/480 VAC with a full input range of 249 to 528 VAC. Available in 24, 36 and 48 VDC standard output variants, each model includes +5V stand-by and 12V auxiliary outputs.

At the end of the first quarter of 2022, Enel Colombia remained the leading power generation company in terms of net installed capacity, with a 20.2% share of the National Interconnected ...

Available in 12, 24 and 48 VDC standard output variants, this series of high performance AC/DC power supplies provides up to 200 W of steady output power with moving air, and 160 W with convection cooling over the full 90 - 264 VAC ...

OPUS HE power systems are robust backup power systems that deliver from 2 - 24 kW of output power at 48, 60, 110, 125 and 220 VDC, and from 1.5 - 18 kW at 24 VDC output. The cabinets have standard configurations for 3, 6 or 12 MHE rectifier modules, VIDI+ controllers, connections for mains and battery, and load distribution fuses or MCBs.

Rated for 250W with free-air convection and 400W with forced air, this power supply includes an integral 12V fan output, eliminating the need for an additional fan supply. The power supply can be disabled with a logic signal and dissipates less than 0.5W in stand-by mode allowing for system level Energy Star compliance.

OPUS 5U rack high efficiency power system consists of Enedo's MHE rectifiers, VIDI2 controllers, connections for mains and 1 full current battery string, and bulk screw terminal for external load distribution. Available as a 19" 5U rack-mountable package, the system delivers a maximum 6 kW output power at 48, 60, 110, 125 and 220 VDC, and 4 ...

The DDP400 sealed AC/DC power supplies are potted and offer IP67 ingress protection. They come in standard output voltages of 12, 24, 36 and 48 VDC, with auxiliary 12V fan and 5V stand-by outputs. ... Enedo Headquarters Martinkyläntie 43 01720 Vantaa Finland.
