

Where is EnerDel based?

Founded in 2004, EnerDel is headquartered in Anderson, IN. EnerDel was the first in the U.S. for commercial-scale production of large-format, prismatic, lithium-ion battery packs.

When will EnerDel build iego 800V battery packs?

EnerDel's engineering team designed and procured the components to build the first iEGO 800V battery packs, leveraging NMC (Nickel Manganese Cobalt) VDA modules as the building block. The build is scheduled mid-February, 2023 with testing and validation to begin immediately after at EnerDel's Headquarters in Anderson, IN.

What does EnerDel do?

EnerDel, Inc., together with its subsidiaries, engages in developing and manufacturing rechargeable lithium-ion batteries and battery systems in the United States and South Korea. It operates in three segments: Battery, Fuel Cell, and Nanotechnology. The Battery segment offers lithium-ion batteries for hybrid, plug-in hybrid, and electric vehicles,

How does the EnerDel 800V battery pack work?

The two-layer 800V battery pack integrates the base and the cooling plate in a single structure, maximizing volumetric density. After testing, EnerDel Engineering will develop a production intent design and manufacturing plan based on lessons learned. The next phase of the validation plan will focus on regulatory and customer requirements.

What will EnerDel engineering do after testing iego battery packs?

After testing, EnerDel Engineering will develop a production intent design and manufacturing plan based on lessons learned. The next phase of the validation plan will focus on regulatory and customer requirements. Mass production of iEGO battery packs for customers is slated to commence mid-2024.

When did EnerDel close?

EnerDel closed its last funding round on Dec 21, 2009 from a Post-IPO Equity round. Who are EnerDel's competitors? Alternatives and possible competitors to EnerDel may include Phylion Battery, New Flyer Industries, and K2 Energy.

The new plant will give EnerDel the capacity to produce battery packs for approximately 600,000 hybrid electric vehicles, or 60,000 battery electric cars. It will be financed through a \$118.5 million grant awarded under the federal stimulus package under a 50:50 cost-share program, of which EnerDel plans to spend \$60 million in 2010. ...

Energy Storage. Transportation. Industrial. EnerDel's Secure+ energy storage systems provide greater reliability, scalability and efficiency compared to other battery-based solutions for a variety of residential, commercial and industrial applications: EnerDel's Vigor+ battery packs, which provide an off-the-shelf solution for electrifying buses, trains, subways, trolleys and trams to ...

EnerDel's battery packs are designed to meet the challenging power and energy requirements of a variety of applications. Our packs offer versatility across a variety of applications including transportation, heavy duty buses and trucks, industrial equipment, trolley buses, trams, construction, agricultural machines and military and civilian mobile hybrid power systems.

Ultimately I'm aiming to have multiple battery packs paralleled and a couple of BEL inverter/charger units powered by them. I'm guessing that using the inverter section will work ok, but I may have to only drive one as a charger, or develop a scheme to separate and charge independently. ... I have a test bench where I can plug it into a 12s ...

In cooperation with Enerdel, Elithion now offers 1.5 kWh, 48 V Enerdel battery blocks with and integral BMS board, ready for easy inclusion in your high performance traction pack for a race EV. One to 16 modules may be used for traction packs from 44 to 700 V, from 1.5 to 20 kWh, from 40 to 700 kW peak power.

EnerDel, a leading Li-ion battery pack manufacturer, completed the first phase of their next generation family of battery packs, iEGO. EnerDel's engineering team designed and procured the components to build the first iEGO 800V battery packs, leveraging NMC (Nickel Manganese Cobalt) VDA modules as the building block.

EnerDel, Inc., together with its subsidiaries, engages in developing and manufacturing rechargeable lithium-ion batteries and battery systems in the United States and South Korea.
