

Energy storage investment state-owned enterprises

Are energy storage investors moving to state-owned enterprises (SOEs)?

This implies a major shift in energy storage investors to state-owned enterprises (SOEs) from power grid companies such as China Energy, Huaneng, Huadian, and State Power Investment Corporation (SPIC) .

Can China scale up energy storage investments?

This study explores the challenges and opportunities of China's domestic and international roles in scaling up energy storage investments. China aims to increase its share of primary energy from renewable energy sources from 16.6% in 2021 to 25% by 2030, as outlined in the nationally determined contribution .

Should energy storage technologies be included in emerging infrastructure asset classes?

To meet investor demand, all types of new energy storage technologies need to be included as the emerging infrastructure asset classes, which have not yet been introduced by the NDRC .

How can energy storage technologies address China's flexibility challenge in the power grid?

The large-scale development of energy storage technologies will address China's flexibility challenge in the power grid, enabling the high penetration of renewable sources. This article intends to fill the existing research gap in energy storage technologies through the lens of policy and finance.

How many energy storage projects were approved in 2021?

In 2021, there were 136 approved energy storage projects, comprising 131 electrochemical and 5 pumped hydro storage projects.

When will energy storage technology be commercialized?

By 2025, the large-scale commercialization of new energy storage technologies with more than 30 GW of installed non-hydro energy storage capacity will be achieved; and by 2030, market-oriented development will be realized .
