

Other pages in section Block G (Ceiba Field and Okume Complex) The Ceiba Field and Okume Complex assets comprise six oil fields offshore Equatorial Guinea. The Ceiba Field is located in 600-800 m of water depth on ...

Antonio Oburu Ondo, Equatorial Guinea's recently appointed Minister of Mines and Hydrocarbons, has awarded independent exploration and production company, Panoro Energy, a 56% participating interest and ...

Cryogenic energy storage (CES) is the use of low temperature (cryogenic) liquids such as liquid air or liquid nitrogen to store energy. The technology is primarily used for the large-scale storage of electricity. Following grid-scale demonstrator plants, a 250 MWh commercial plant is now under construction in the UK, and a 400.

While talking up its efforts to support the oil and gas industry through the current downturn with a two-year extension to all exploration contracts, the Ministry of Mines and Hydrocarbons has published a new ministerial order that limits to three years the period during which companies can employ expatriate workers. "The order follows years of successful ...
