

Over a third of Europe's renewable electricity comes from wind power. Watch our video to learn how wind energy is powering Europe's cleaner and greener future, boosting energy independence and creating jobs.

Energy storage is an essential enabler of the energy transition. In the past decades, Europe has shifted from an energy system dominated by centralised fossil fuel generation that can be dispatched to match energy consumption at all times, to a system with more and more renewables. Energy storage supports Europe in this transition.

5 November 2024 Statement: EU Energy Commissioner Hearing at the European Parliament Today the Commissioner-designate for Energy and Housing, Dan Jørgensen, faced his hearing from the European Parliament, ...

The European Association for Storage of Energy (EASE) located in Brussels, Belgium, is the leading member-supported association representing organisations active across the entire energy storage value chain. EASE supports the ...

The fourth Energy Storage Global Conference takes place on 19 - 21 October 2021 for the first time as a hybrid event, in-person at the Hotel Le Plaza in Brussels* and online. The event is organised by EASE - The European Association for Storage of Energy, with the support of the Joint Research Centre of the European Commission. The Energy Storage Global Conference ...

The German Energy Storage Association (BVES) presented the latest market figures at the trade fair and confirmed the positive development as well as the increasing importance of the energy storage industry. ... Energy ...

While growth has so far been driven primarily by residential storage systems in households, more and more energy suppliers, solar and wind farm operators, as well as ...

China Energy Storage Alliance (CNESA) T: +86-10-6566-7066 F: +86-10-6566-6983 E: conference@cnesa
ESIE expo:en.esexpo Address Room2510, Floor25, Bldg. B, ...

Energy Storage Fuel Cells & Hydrogen Bio Energy Shale Gas Smart Cities ... EERA is an association of public research centres and universities with the mission to catalyse European energy research for a climate-neutral society by ...

Held alongside the Battery Show Expo Europe in Stuttgart, Germany (3-5 June 2025) this Summit brings

together the key players driving the country's utility-scale storage boom. With ...

The ninth edition of the European Market Monitor on Energy Storage (EMMES) by the European Association for Storage of Energy (EASE) and LCP Delta, is now available, highlighting Europe's rapid expansion in energy storage ...

energy storage power capacity requirements at EU level will be approximately 200 GW by 2030 (focusing on energy shifting technologies, and including existing storage capacity of approximately 60 GW in Europe, mainly PHS). By 2050, it is estimated at least 600 GW of energy storage will be needed in the energy system.

The Energy Storage Global Conference (ESGC) is back! The conference's fifth edition will be held on 11 - 13 October 2022 and is organised by EASE - The European Association for Storage of Energy, with the support of the European ...

A Commission Recommendation on energy storage (C/2023/1729) was adopted in March 2023. It addresses the most important issues contributing to the broader deployment of energy storage. EU countries should consider the double "consumer-producer" role of storage by applying the EU electricity regulatory framework and by removing barriers, including avoiding ...

EASE, located in Brussels, is the leading member-supported association representing organisations active across the entire energy storage value chain. EASE supports the deployment of energy storage to support the cost-effective ...

EASE supports the deployment of energy storage to support the cost-effective transition to a resilient, climate-neutral, and secure energy system. EASE was established in 2011 and ...

The European Association for Storage of Energy (EASE) is the voice of the energy storage community, actively promoting the use of energy storage in Europe and worldwide.

The Critical Raw Materials Act Briefing. The European Union proposed the Critical Raw Materials (CRM) Act on 16 March 2023. The CRM Act focuses on identifying and mapping the supply and demand of critical and strategic raw materials of which some are used in the development of energy storage technologies and developing sustainable and responsible sourcing strategies.

The European Association for Storage of Energy (EASE) is the voice of the Energy Storage community by having over 40 members representing electric grid operators, utilities, research, ...

ees Europe - Europe's Largest and Most International Exhibition for Batteries and Energy Storage Systems. Exhibition: May 7-9, 2025 Conference: May 6-7, 2025. Get your ticket; Exhibition Info. ees Europe at a Glance. Login. The smarter E Login - Exhibition and ...

The official website of the European Commission, providing access to information about its political priorities, ... Energy, Climate change, Environment. Overall targets and reporting; ... The European Commission is ...

Monitor energy storage growth in the National Energy & Climate Plans; As renewable energy continues to expand in Europe, energy storage must keep pace to ensure the grid remains flexible and stable. The Energy Storage ...

EASE is glad to support EES Europe 2025, taking place from 6-9 May 2025 in Munich, Germany. The event features both the EES Europe Exhibition and the EES Europe Conference. The exhibition, one of Europe's largest and most international for batteries and energy storage systems, will take place from 7-9 May 2025 offers invaluable networking opportunities for ...

Subscribe to Newsletter Energy-Storage.news meets the Long Duration Energy Storage Council Editor Andy Colthorpe speaks with Long Duration Energy Storage Council director of markets and technology Gabriel ...

The bulk of EU solar power comes from building installations, which make up around two-thirds (over 220 GW) of current EU solar capacity. Despite a recent slowdown in the rooftop segment, it still provided close to 60% of Europe's newly installed solar capacity in 2024, and the prominence of rooftop solar is unlikely to change in the foreseeable.

Energy storage technologies: All existing energy storage technologies with their characteristics. Front of the meter facilities: List of all energy storage facilities in the EU-28, ...

The European Association for Storage of Energy (EASE) is organizing the Energy Storage Global Conference in Brussels Belgium, on 15-17 October 2024. At #ESGC2024, attendees will have the opportunity to immerse themselves in a comprehensive program designed to provide invaluable insights, networking opportunities, and in-depth discussions led by ...

Become a part of the leading energy storage association in Europe, and help drive energy storage forward! EASE membership grants your organisation the opportunity to be directly involved in the EU decision making process. Additionally, you will benefit from a variety of services, including market intelligence updates, advise and analysis on ...

The main energy storage method in the EU is by far "pumped hydro" storage, but battery storage projects are rising. A variety of new technologies to store energy are also ...

Discover how the EU's policies and regulations drive energy storage innovation, ensuring a clean, secure, and resilient energy future. Key Projects, Initiatives and Market This section outlines ...
