

# Good news for energy storage companies college entrance examinations in 2023

Will energy storage costs remain high in 2023?

Costs are expected to remain high in 2023 before dropping in 2024. The energy storage system market doubles, despite higher costs. The global energy storage market will continue to grow despite higher energy storage costs, adding roughly 28GW/69GWh of energy storage by the end of 2023.

What will energy storage look like in 2023?

At the beginning of each year, we pause to reflect on what has happened in our industry and gather our thoughts on what to expect in the coming 12 months. These 10 trends highlight what we think will be some of the most noteworthy developments in energy storage in 2023. Lithium-ion battery pack prices remain elevated, averaging \$152/kWh.

What will be the future of energy storage?

In addition, we think that two major energy storage system (ESS) products will be launched and that at least one large-scale two- or three-wheeled-vehicle company will announce a vehicle model powered by sodium-ion batteries. Solid-state batteries progress, with new announcements potentially adding more than 40GWh.

When is Gaokao Exam 2023?

Every year, during the days of the exam, Gaokao-related topics take Chinese social media by storm. For those who have already passed the exam, it is a time of sending best wishes, reminders or simply nostalgia towards youth. Students run out of a venue after the first day's exam on June 7, 2023. /CFP

How much does an energy storage system cost in China?

Such creative workarounds will become increasingly likely among Chinese companies, especially among those that are interested in expanding into the US. Energy storage system costs stay above \$300/kWh for a turnkey four-hour duration system.

How much does an energy storage system cost?

Energy storage system costs stay above \$300/kWh for a turnkey four-hour duration system. In 2022, rising raw material and component prices led to the first increase in energy storage system costs since BNEF started its ESS cost survey in 2017. Costs are expected to remain high in 2023 before dropping in 2024.
