

Who owns Greenland technologies?

Led by CEO, Raymond Wang, Greenland Technologies ' (NASDAQ:GTEC) U.S. based subsidiary, HEVI, seems to have emerged as a force of innovation and sustainability, responding to the pressing demands of the industry. Looking at the historical impacts of the industry, there are few more impactful companies than John Deere and Caterpillar.

What is Greenland Technologies' Vision for the future?

Amid this landscape of industry giants, Greenland Technologies has emerged with a resolute vision for the future - electrification and sustainability. The company is introducing a much-needed shift towards environmentally friendly technologies, in line with the increasing global demand for reduced carbon emissions and energy-efficient equipment.

Does Greenland have a decentralised energy system?

No comprehensive study on Greenland has been found, as existing studies focus on small individual communities. Such studies provide a tailored perspective on decentralised energy systems, considering local climate conditions, energy demand, and quality of local renewable resources.

What is the primary energy mix of Greenland?

As presented in Fig. 2, the primary energy mix of Greenland changes notably between 2019 and 2050. In the reference scenario, oil constitutes around 80% of the primary energy consumption, with the rest being supplied mainly by hydropower.

How does heating work in Greenland?

In the reference system, a major share of heating in Greenland is supplied by district heating, which is dominant in larger towns. However, as the population density is quite low and towns are dispersed, many households use oil for heating, constituting 57% of total heat production. Another 15% of heat is supplied by electricity.

Is Greenland a potential E-Fuels hub?

Greenland's transition from a fossil fuels-based system to a 100% renewable energy system between 2019 and 2050 and its position as a potential e-fuels and e-chemicals production hub for Europe, Japan, and South Korea, has been investigated in this study using the EnergyPLAN model.
