

Massachusetts is expected to set energy storage targets soon, while Maryland's state legislature instructs the state's Power Plant Research Programme to investigate market reforms and potential incentives to help ...

According to the latest U.S. Energy Storage Monitor, a quarterly publication from GTM Research and the Energy Storage Association (ESA), the U.S. deployed 41.2 MW of energy storage in ...

Image: GTM Research. US energy storage had a fairly quiet period in the third quarter of this year deploying just 16.4MW / 31.4MWh but enjoyed a record quarterly sum of US\$660 million of corporate investment. ... produced in conjunction with the national Energy Storage Association, venture funding and project financing, where disclosed ...

The first quarter of 2017 was the biggest in history for the U.S. energy storage market. According to GTM Research and the Energy Storage Association's (ESA) latest U.S. Energy Storage Monitor ...

While research published this week demonstrates that the US as a whole is embracing energy storage technology, with regulator FERC's recent wholesale market ruling likely to have a 'significant impact', the picture varies greatly when looking from state-to-state, an analyst has said.

Energy storage installations in the US this year are expected to be treble what they were in 2014, making it the 'biggest year ever' for storage, according to the latest forecasting by GTM Research. GTM has just published the latest instalment of its US Energy Storage Monitor in association with the national Energy Storage Association.

According to the latest figures from the U.S. Energy Storage Monitor produced by GTM Research and the Energy Storage Association, 187 megawatts of storage capacity was installed in the U.S. last ...

According to the latest U.S. Energy Storage Monitor from the Energy Storage Association and Wood Mackenzie Power & Renewables (formerly known as GTM Research) 156.5 megawatt-hours of energy ...

According to GTM Research and the Energy Storage Association's (ESA) U.S. Energy Storage Monitor, this is the most grid-interactive behind-the-meter energy storage ever deployed in a single quarter.

The growth is expected to continue for at least the next five years, added Manghani, author of the GTM Research-Energy Storage Association U.S. Energy Storage Monitor 2014 Year In Review.

2014 was the biggest year for behind-the-meter (also known as customer-sited) energy storage deployments, according to the inaugural GTM Research and Energy Storage Association U.S. Energy Storage ...

According to GTM Research and the Energy Storage Association's U.S Energy Storage Monitor 2016 Year in Review report, 230 megawatt-hours came on-line in the fourth quarter of the year, more than ...

Get the trusted data and insight you need to thrive in a rapidly decarbonising energy landscape. Power & Renewables. Accelerate the move to clean energy with low-carbon intelligence connecting assets, markets, and companies. Gas ...

Fast forward to 2015, the U.S. energy storage market saw a remarkable 243 percent growth, according to a recent report by GTM Research and the Energy Storage Association (ESA). In fact, there was more energy storage capacity deployed in just one quarter of 2015 (112 megawatts) than in 2013 and 2014 combined (106 megawatts).

U.S. Energy Storage Monitor is a quarterly publication of GTM Research and the Energy Storage Association (ESA). Each quarter, we gather data on U.S. energy storage deployments, prices, policies, regulations and business models. We compile this information into this report, which is intended to provide the most comprehensive, timely analysis of

Dive Insight: GTM Research and the Energy Storage Association already noted the first quarter of this year was the largest ever for energy storage.. There were 71 MW of ...

According to a recent report released by GTM Research and the Energy Storage Association, 2015 is shaping up to be the biggest year yet in the energy storage sector, with a projected deployment of 220 MW. This amount is expected ...

The Future of Graphene in Batteries and Energy Storage. In this insightful interview, we sit down with the founder and CEO of Carbon Waters, Alban Chesneau--an expert in biotechnology and nanomaterials.

According to Ravi Manghani, GTM Research's director of energy storage, Q4 2016 was an inflection point in storage deployments in the US, with 230MWh coming online; more than the sum of the previous 12 quarters ...

GTM Research expects 295 megawatts of energy storage to be deployed in total in 2017, up 28 percent from the 231 megawatts deployed in 2016. Source: GTM Research / ESA ...

A new report from GTM Research investigating the US market for energy storage management systems has concluded that the market should grow tenfold between 2014 and 2019, reaching \$136 million by 2019.

The energy storage market is kind of like the Loch Ness Monster -- It's rarely seen. ... GTM Research, Utility Dive, Bloomberg New Energy Finance, Bloomberg, McKinsey & Company, i3 (Cleantech ), Lazard, ...

The International Energy Association (IEA) estimates that, in order to keep global warming below 2 degrees Celsius, the world needs 266 GW of energy storage by 2030, up from 176.5 GW in 2017.3 Under current trends, Bloomberg New Energy Finance predicts that the global energy storage market will hit that target, and grow quickly to a

Last year, the U.S. Energy Storage Monitor from GTM Research and Energy Storage Association (ESA), reported that 61.9 MW of energy storage came online in the U.S. Of that, over a third was delivered by Greensmith. ... The company focuses on stationary Energy Storage across all applications from Residential, Self - Consumption and Microgrid ...

GTM Research, a leading market intelligence and consulting firm focused on the transformation of the global energy industry, and the Energy Storage Association (ESA), the U.S.-based trade ...

GTM Research/ESA | U.S. Energy Storage Monitor: Q3 2016 2 About This Report U.S. Energy Storage Monitor is a quarterly publication of GTM Research and the Energy ...

Energy Transition. In depth analysis of the energy transition and the path to a low carbon future. CCUS. Explore the future growth potential for carbon capture, utilisation and storage.

Follow us there! | GTM Research's coverage spans the clean energy industry including the solar power, grid edge, energy storage and wind power sectors. GTM Research | 1,501 followers on LinkedIn.

The world is witnessing a remarkable surge in renewable and sustainable energy sources. With this surge comes a pressing need for effective energy storage solutions. And it's no surprise that the energy storage market is experiencing explosive growth, as revealed in a recent report by GTM Research and the Energy Storage Association - the US Energy Storage Monitor.

According to GTM Research and ESA's latest U.S. Energy Storage Monitor, the U.S. deployed 18.3 megawatts (21.2 megawatt-hours) of energy storage in the first quarter of 2016. Deployments were up ...

Energy storage deployment grew nearly 1,000% in Q1 2017. But a new GTM Research report says that pace will probably not last the rest of the year.

Corporate investment in energy storage in the U.S. in the third quarter (Q3) of 2016 reached an all-time high of \$660 million, finds GTM Research's latest U.S. Energy Storage ...
