

How do you store cast iron cookware?

Place a piece of paper towel between stacked pans. You may have more than one cast iron pot or pan to store. If you're stacking cast iron cookware, always place a piece of paper towel between cast iron pots and pans. This prevents scratches and other damage. Store your cast iron cookware in an oven.

Can cast iron cookware be stored wet?

You should never store cast iron cookware that is still wet. This can easily lead to rust. You should dry the cookware as much as you can with a towel. Then, set the pan or pot on the stovetop at low heat. Leave for a few minutes, as long as it takes for the pan or pot to get warm.

Does cast iron cookware rust?

Cast iron cookware is popular because it tends to last a long time. However, cast iron does have a tendency to rust if stored improperly. You should always store cast iron cookware in a clean, dry place. Prior to storage, cast iron cookware should be clean and completely dry.

Can you leave cast iron cookware on the stove?

Many people leave cast iron cookware on the stove for storage. If you don't mind having a pot or pan out all the time, this is generally safe. However, remove cast iron cookware when using the stove. You do not want steam or water to accidentally get cast iron cookware wet.

How long does cast iron cookware last?

Pots, pans, and skillets made of cast iron that have been seasoned correctly, well-maintained and stored in the correct environment, can last a lifetime. Cast iron cookware is as close to indestructible as you can get.

How do I keep my cast iron cookware moist?

Pack your cast iron cookware full of crumpled paper towels, newspaper, or even inexpensive dish towels. Try to make sure that all the internal space is occupied with just a little room for air. Another great way to beat humidity is to toss in a little dry rice. It effectively absorbs moisture.
