

Is Guatemala a good place to invest in solar energy?

Guatemala is the second largest Central American power market, with a goal to increase renewable energy use. Relatively high levels of solar irradiance and large areas of cleared land give the country a strong potential for increased solar energy development.

Does Guatemala have solar energy?

Notably, Guatemala has seen previous ventures into solar energy, including the announcement of a 5 MW photovoltaic project in 2014 and a subsequent tender for a 110 MW project in 2019, which was later cancelled. As of 2023, the country had an installed photovoltaic capacity of 105 MW, according to IRENA statistics.

Why did BMR decide to buy a solar farm in Guatemala?

As part of its evaluation process, BMR determined that the solar farm offered a strong return that was supported by Guatemala's well-established and stable regulatory system. BMR navigated a complex and cooperative sales process that involved four owners across three legal jurisdictions.

How much electricity does Magdalena Solar generate a year?

Expected to be operational by mid-2025, Magdalena Solar is projected to generate approximately 141 GWh of electricity annually.

So you'll need a 600-700Wh solar generator to power the TV for a day (not all of a solar generator's capacity is available for use -- usually 80 to 85%). The size (in terms of capacity) of the solar generator you get also depends on how long you want to power appliances.
