

Hydraulic wire cutter energy storage device

What is a hydraulic wire cutter?

The EWCH-Series Hydraulic Wire and Cable Cutters are ideal for use in production facilities where demanding, high-volume cutting applications are often encountered. Each tool is driven by a specialized external hydraulic pump, which provides greater cutting force and allows for higher duty cycles compared with other cutter types.

What is an electric wire and cable cutter?

Each tool is driven by a specialized external hydraulic pump, which provides greater cutting force and allows for higher duty cycles compared with other cutter types. The EWCE-Series Electric Wire and Cable Cutters combine the efficiency and safety of their hydraulic counterparts with the greater portability of electric tools.

What is a Holmatro hydraulic cable cutter?

The Holmatro Hydraulic Cable Cutters are highly efficient hydraulic cutting tools designed with a maximum working pressure of 700Bar /10,000 Psi. These cutters are ideal for cutting power cables and are frequently used in construction industry, dismantling and demolishing, decommissioning, offshore installation and infrastructure

How long does it take to maintain a hydraulic cable cutter?

With their powerful hydraulic capability, these cable cutters ensure precise and efficient cable cutting operations in a variety of industrial applications. Daily maintenance will take approximately 1-2 minutes of your time but will ensure that your cutter stays in optimal condition! Your pump for Hydraulic Cable Cutter

What is a krg-32 Te cable cutter?

The KRG-32 TE electro-hydraulic wire rope and cable cutter, for example, can handle wire ropes up to 25 mm in diameter and cables up to 32 mm in diameter - depending on the material quality. The device is also ideal for cutting steel-reinforced aluminum conductor cables with high-strength strand cores (ACSR cables).

What are cable cutters used for?

These cutters are ideal for cutting power cables and are frequently used in construction industry, dismantling and demolishing, decommissioning, offshore installation and infrastructure. One of the key features of these cable cutters is their supply guillotine action, which makes them nearly silent during operation.

Zhao Xiaowei et al. [99] designed an offshore hydraulic energy storage device with a structure consisting of a closed-loop oil circuit (connecting pump and motor) and an open-loop seawater circuit (connecting pump-motor, hydraulic accumulator, and relief valve), as shown in Fig. 10. The energy storage device (hydraulic accumulator) is connected ...

HYDRAULIC WIRE CUTTER - 6FT - 954 ACSR G, A single lineworker can easily cut large-gauge conductors with the power-assist of this tool's closed hydraulic system. It operates like a ...
