

Does Laos have a solar sector?

The news is also a positive development for the Laos solar sector. Last year, the country began construction on its first large-scale solar farm, a 50MW project in the south-east province of Attapeu, and the government has already made plans to expand its solar sector further.

When will Imperial Star Solar be operational in Laos?

Already under construction, the facility is expected to be operational in May 2024, with all preparations and construction on schedule, said Regan Fei, Laos' branch general manager at Imperial Star Solar.

Is Laos a good country to invest in solar?

The government aims to increase the contribution of renewables to 11% by 2025, and while SolarSpace did not specify where its Laos-made modules would be shipped, the presence of a major manufacturing facility in the country is an important step in demonstrating the viability of Laos as a country capable of significant solar investment.

Where is SolarSpace based?

With six production sites, including those in Laos and Cambodia, SolarSpace boasts a total production capacity exceeding 30 GW for high-efficiency cells and 5 GW for high-efficiency modules. The company offers PERC and N-type TOPCon technologies to customers in China, Europe, India, Australia, and various other countries.

With an estimated investment of US\$1 billion, the solar farm aims to install 3-4 million solar panels, generating an impressive 1,500-1,600 megawatts of electricity upon completion. Each solar panel, measuring 1.20 meters wide and 2.40 meters long, is designed to generate 600 watts, making them a powerful and efficient energy source.

1 · Chinese Clean Energy Giant CGN Breaks Ground on Laos' First Solar Power Generation Project (Yicai) Dec. 19 -- China General Nuclear Power Group, a state-owned atomic and ...
