Should Ukraine invest in solar power?

Semenyshynsaid the country needs to promote smart grids and energy systems built around residential solar. Several associations are calling for 50 percent of Ukraine's electricity production to come from wind, solar and other carbon-free power by 2030.

What is Ukraine doing with solar energy?

Ukraine's Solar Association is also working to provide solar and storage systems to hospitals, particularly in cities that were once under Russian occupation. Green groups like Ecoclub, an NGO based in western Ukraine, have also been involved in that effort.

What is the law of Ukraine on the electricity market?

The Law of Ukraine "On the Electricity Market" defines imbalances in electrical energy as the difference between actual volumes of delivery or consumption, import, and export of electrical energy by the party responsible for the imbalance, and the volumes of purchased and sold electrical energy.

How can development banks help Ukraine's energy sector?

International funding has long been an important source of capital for Ukraine's energy sector. Development banks will play an important role in unlocking private sector investment potentialin the RE sector. MDBs can provide essential loan and risk insurance products to enable both short- and long-term investment.

How many solar power plants are under occupation in Ukraine?

As of September 2022, approximately 13% of Ukrainian SPP capacities are under occupation, with 6% of the total installed solar capacity destroyed or impaired.

What will Ukraine's new energy policy look like after enactment?

An upcoming directive will revise this existing one, with the amendments becoming legally binding 18 months post-enactment. For specific sectors, the targets include 14% for transport and 40% for heating and cooling. Ukraine, aligning with these commitments, is focusing on enhancing renewable energy and technological advancements.
