

# India's new energy storage subsidy policy

Does India have an energy storage obligation?

Image: Alok Sharma via Twitter. India's government has added an Energy Storage Obligation alongside its Renewable Purchase Obligation for the first time. Meanwhile, a government thinktank has predicted around 180GWh of demand for batteries for stationary energy storage systems (ESS) by 2030.

How many GWh will India's energy storage demand be by 2030?

Meanwhile, a government thinktank has predicted around 180GWh of demand for batteries for stationary energy storage systems (ESS) by 2030. India's government has added an Energy Storage Obligation alongside its Renewable Purchase Obligation for the first time.

How will India achieve its energy goals by 2030?

Photo: by freepik With its ambitious energy goals riding on ramping up of its battery energy storage systems (BESS), India is rolling out several incentive-laden policies to attract an investment of Rs 5,40,000 crore by 2030. The push aligns with country's climate goals and meet the demands of its burgeoning renewable energy sector.

Why should India invest in energy storage systems?

6.11.1. India's surge in energy demand and rapid shift towards renewable energy sources offers opportunities for emerging Energy Storage System (ESS) technologies. Domestic innovation and manufacturing of ESS technologies can stimulate job creation, economic growth, and position India as a global leader in sustainable and low-carbon energy systems.

Will India achieve 500 GW of non-fossil fuel capacity by 2030?

With India aiming for 500 GW of non-fossil fuel capacity by 2030, energy storage is essential. The expanded VGF target will accelerate renewable adoption by making storage solutions more affordable.

What will India's energy storage requirements be in 2026-27?

They are now a key part of energy plans, especially those using solar and wind energy. According to the National Electricity Plan (NEP) 2023, unveiled by the Central Electricity Authority (CEA), India's storage requirement from BESS will rise to 34.72 GWh in 2026-27.

India's power generation planning studies estimate that the country will need an energy storage capacity of 73.93 gigawatt (GW) by 2031-32, with storage of 411.4 gigawatt hours (GWh), to integrate planned renewable ...

Subsidy policies for energy storage technologies are adjusted according to changes in market competition, technological progress, and other factors; thus, energy storage subsidy policies are uncertain. In this section, the investment decision of energy storage technology with different investment strategies under an uncertain

policy is studied.

Content Owned by MINISTRY OF NEW AND RENEWABLE ENERGY . Developed and hosted by National Informatics Centre, Ministry of Electronics & Information Technology, Government of India. Last Updated: Apr 11, 2025

NEW DELHI, Sept 6 (Reuters) - India will offer \$452 million in incentives to companies to set up battery storage projects, in a bid to boost the country's green energy capacity, a top minister ...

India's government has added an Energy Storage Obligation alongside its Renewable Purchase Obligation for the first time. Meanwhile, a government thinktank has predicted around 180GWh of demand for batteries ...

Innovative policy interventions such as ISTS waiver, RPO trajectory till 2029-30, Green Open Access Rules introduced ... Solar Energy Corporation of India Limited (SECI) is a Schedule-A CPSE under the Ministry of New and ...

This approach has pushed India's total energy subsidies to 9-year high of USD 39.3 billion for the fiscal year ending 2023, states a new IISD report. IISD in the news Times of India

The future of India's energy security lies in fostering bold, actionable reforms that drive innovation, resilience and growth across the sector.&quot; Saurabh Marda, Co-founder and Managing Director, Freyr Energy, stated, ...

effectiveness of energy storage technologies and development of new energy storage technologies. 2.8. To develop technical standards for ESS to ensure safety, reliability, and interoperability with the grid. 2.9. To promote equitable access to energy storage by all segments of the population regardless of income, location, or other factors.

With its ambitious energy goals riding on ramping up of its battery energy storage systems (BESS), India is rolling out several incentive-laden policies to attract an investment of ...

India aims for 500 gigawatts of renewable energy capacity by 2030, focusing on energy storage solutions to support this transition. The renewable energy storage sector is advocating for ...

The notice outlines subsidy policies for new energy storage, including the following: Independent energy storage capacity will receive a capacity compensation of 0.2 CNY/kWh discharged, gradually decreasing by ...

India has set a target to achieve 50 percent cumulative installed capacity from non-fossil fuel-based energy resources by 2030 and has pledged to reduce the emission intensity of its GDP by 45 percent by 2030, based on 2005 levels.

The user-side energy storage investment under subsidy policy uncertainty. Author links open overlay panel Manli Zhao a, Xinhua Zhang a, C. James Hueng b. ... India is advocating a Time-of-Use (TOU) tariff policy, with the government providing supports for the development of user-side energy storage through incentive schemes such as financial ...

India has set a target to achieve 50% cumulative installed capacity from non-fossil fuel-based energy resources and to reduce the emissions intensity of its GDP by 45% by ...

RE.26 Viability Gap Funding for Battery Energy Storage System and Pumped Storage Plants : Jurisdiction Central Government Legislation/ endorsing organization Union Cabinet Policy objective(s) of subsidy Foster the creation of financially viable grid-scale long-duration energy storage through 2023 - 2023) -

Karnataka Renewable Energy Policy 2022-2027: 10 (Ten) GW of additional RE projects with or without energy storage systems in the State, including up to 1 GW of Rooftop solar PV projects (1.1 mb, PDF) View : 22: 25.11.2013: Power ...

New Delhi: The Union Ministry of New and Renewable Energy (MNRE) may soon mandate the inclusion of battery storage capacity in upcoming solar and wind power plants, according to a senior government official.The ...

Introduction. PM Surya Ghar: Muft Bijli Yojana (PMSGMBY), the world's largest domestic rooftop solar initiative, has achieved a historic milestone with 10 lakh homes now ...

Positives of India's Energy Transition: Significant Subsidy Reduction: Redirecting funds from fossil fuels to renewables represents a major shift towards sustainability. Rural Energy Access: Improved access to LPG ...

In 1980, New Energy and Development Organisation (NEDO) now known as New Energy and Industrial Technology Development Organisation was established [47]. NEDO was set up to find alternatives for ESS like pumped hydro with construction periods that are long, large budgets and environmental factors that are associated with it.

In this article, we explore the various government policies and incentives designed to accelerate the development of batteries, the EV sector, and EV charging infrastructure in India. These initiatives are playing a vital ...

ETN news is the leading magazine which covers latest energy storage news, renewable energy news, latest

hydrogen news and much more. ... IESA brings stakeholders under one roof to deliberate on India's stationary ...

India Energy Storage Alliance (IESA) president Dr Rahul Walawalkar told Energy-Storage.news that with the awards and the promise of a quick start to advanced battery manufacturing in the country, India has taken a ...

Union Minister for New and Renewable Energy Shri Pralhad Joshi posted on X &quot; India's renewable energy sector has contributed immensely to the #10YearsOfMakeInIndia. ... and battery energy storage systems for utility-scale electricity storage applications. ... and CPSU Scheme Phase-II, where Government subsidies are provided. Other policies ...

Government Order and will be valid for a period of five years or till a new policy is announced. ... & Energy Storage Policy 2017 was examined and placed before the Cabinet meeting held on 27.05.2021. Zero capital subsidy offered ...

India's government has proposed a \$455.2 million subsidy initiative aimed at fostering large-scale battery storage projects. To minimize potential economic risks, the Indian ...

New Delhi | 08 May 2024 -- In a significant step forward for India's energy transition, the Delhi Electricity Regulatory Commission (DERC) has granted regulatory approval of India's first commercial standalone Battery Energy ...

Finance minister Nirmala Sitharaman (centre) unveiling the 2023-2024 budget this time last year, in New Delhi. Image: Union Gov't of India. As India's Union government prepares the fiscal year 2024-2025 budget for its unveiling, trade group India Energy Storage Alliance (IESA) has offered some recommendations to support the technology.

Electric utility and generation company Tata Power has received regulatory approval to deploy a centrally controlled battery storage system in Mumbai, India. India's first ...

In October 2021, the Government of India set a target of 450 GW of renewable energy capacity by 2030 and later at the 26th Conference of the Parties (COP 26) to the UN ...
