

What is the power sector like in Palau?

The Republic of Palau's power sector is highly dependent on conventional fossil fuel generation, with diesel generators supplying electricity to cover most of the country's total demand. Currently, there are a total of five main power plants on different islands in Palau, supplying electricity to meet the load.

What is the optimal power system for Palau?

The optimal system includes the current power system together with additional renewable capacity coupled with battery storage. The results of the optimisation show that Palau's current power system is dominated by diesel generation, with renewable energy only taking a small share (just 4%).

How many power plants are there in Palau?

Currently, there are a total of five main power plants on different islands in Palau, supplying electricity to meet the load. The two largest power plants are the Malakal and Aimeliik power stations, which have total generation capacities of 15.5 MW and 10 MW respectively.

What type of electricity is used in Palau?

Renewable electricity here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal power. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Palau: How much of the country's electricity comes from nuclear power?

How many diesel generators are there in Palau?

For this study, it was assumed that the total diesel generation capacity of Palau's current power system is 20 MW (the four largest generators present in Palau). Table 2 shows in more detail the generation capacity for each power plant currently present in the country. Source: PPUC and PEA data (n.d.).

How to model Palau's power and transport sectors?

Figure 1 is a flow chart of the methodology and models used for this study. To model Palau's power and transport sectors, the Hybrid Optimisation of Multiple Energy Resources (HOMER) software was selected. HOMER is an optimisation tool used for designing both on-grid and off-grid power systems.

Aimeliik Power Plant 2013 | 2015 \$1.75M Construction of the new powerhouse building which supplies electricity for the whole island of Palau. Malakal Wastewater Treatment Plant Oct 2018 | Nov 2019 \$1.2M Civil and Building Works for the Wastewater Treatment Plant Facility. The project is for improvement of Sewage Treatment Plant in Koror, Palau. Surangel
