

Who is Eaton power management?

At Eaton, we're dedicated to improving people's lives and the environment with power management technologies that are more reliable, efficient, safe and sustainable. We are a power management company doing business in more than 175 countries.

Why do companies rely on Eaton?

And the companies behind them depend on us to help solve some of the toughest power management challenges on the planet. At Eaton, we're dedicated to improving people's lives and the environment with power management technologies that are more reliable, efficient, safe and sustainable.

What is Eaton's top priority?

The health, safety and wellbeing of our employees, customers and communities is our top priority. Read our response to COVID-19. Eaton is an intelligent power management company dedicated to improving the quality of life and protecting the environment for people everywhere.

What makes Eaton stand out?

What makes Eaton stand out amongst our peers is our power management focus, our values-based culture and our philosophy to run the enterprise as an integrated operating company. The Eaton Business System (EBS) is the embodiment of our integrated operating company philosophy -- it is how we work at Eaton and how we run our company in a common way.

Why should you work at Eaton?

By giving people tools to use power more efficiently. Helping companies do business more sustainably. And by encouraging each and every employee at Eaton to think differently about our business, our communities--and the positive impact we can have on the world. At Eaton, we make what matters work.

What is the Eaton Business System (EBS)?

The Eaton Business System (EBS) is the embodiment of our integrated operating company philosophy-- it is how we work at Eaton and how we run our company in a common way. It all began in 1911... It was 1911 when a young entrepreneur named Joseph Eaton decided to invest in a new idea in transportation -- the first gear-driven truck axle.

Eaton bietet energieeffiziente Lösungen, die seinen Kunden dabei helfen, elektrische, hydraulische und mechanische Energie effizienter, sicherer und nachhaltiger zu nutzen. Wir von Eaton haben uns dem Ziel verschrieben, durch den Einsatz unserer Energiemanagement-Technologien und -Dienstleistungen für mehr Lebensqualität zu sorgen und die ...

The Eaton Power Systems Experience Center (PSEC) gives a tutorial about the symptoms, sources and solutions for power quality (PQ) problems including 6 case study examples for sags, surge, grounding, transients and harmonics.

Key Features. Automatic Voltage Regulation (AVR) - Stabilizes incoming AC power by boosting low voltages and trimming high voltages so connected devices get the voltage they were designed to use (nominal 120V or 220-240V, depending on your country). Voltage regulation is sometimes called "buck and boost". "Let-Through" Rating - The let-through voltage rating refers to the ...

A var, kvar, reactive or imaginary power is probably the most misunderstood electrical concept. Many explanations like the beer analogy have been used to explain the unexplainable. At Eaton's PSEC, you can learn about kvar and capacitors and PF.

Eaton is an intelligent power management company dedicated to improving the quality of life and protecting the environment for people everywhere. We are guided by our commitment to do business right, to operate sustainably and to help our customers manage power - today and well into the future. By capitalizing on the global growth trends of ...

See how the Eaton Power Quality Experience Center provides training and testing of products in application, focusing on uninterrupted power supply systems (UPS) that ensure quality electrical power for data centers, hospitals, manufacturing and more.

Learn how supercapacitors are able to protect loads from the most common power quality problems and short periods black-outs with lower operating costs, peak shaving capacity and greater scalability for your business.

Key Features of the Eaton PXQ Include: Power Quality Health Index: An exclusive feature of Eaton's PXQ, the PQ Health Index offers an intelligent read-out of circuit health based on rigorous statistical analysis of power quality events and disturbances. This innovation helps safeguard critical systems and enables proactive maintenance.
