

What does Bess stand for?

The contracts were for the 20-MW Brindisi battery energy storage system(BESS) in southern Italy and the 6-MW Sassari unit in Sardinia,which will provide fast reserve grid services for Italian transmission system operator Terna SpA (BIT:TRN).

How did Terna get 230mw?

Terna said the process was participated in by bidders offering six times the amount of capacity being tendered for. The pilot had launched with an expectation that around 230MW would be on offer,Terna received 1,327MW worth of bids, and eventually awarded contracts for 249.9MW.

Does Terna have a MACSE target?

This has reduced the need for procurement of utility storage capacity mainly in the South,resulting in lower MACSE volume targets. However,Terna still has a substantial procurement target of 50 GWh of storage capacity by 2030 under the MACSE scheme.

Does Terna have a storage capacity target?

However,Terna still has a substantial procurement target of 50 GWh of storage capacity by 2030 under the MACSE scheme. In Diagram 1 we summarise how storage flexibility will be key to support RES deployment (top panel) &Terna's target storage capacity volumes (bottom panel).

What's new in Terna's MACSE consultation?

On the 12 th of April 2024 Terna published the documents of the new consultation for the MACSE mechanism. Compared to the previous version,the current draft proposal incorporates the contents of the European Commission's decisions,in addition to some changes following the previous consultation phase.

What happened at Terna's auction in December?

Terna's auction in December attracted 53 bidders offering just over 1.3 GW of fast reserve units,or six times more than what was requested. The round ended with contracts for 250 MW. (EUR 1.0 = USD 1.213)
