

What is the International Solar Alliance (ISA)?

Read more ... The International Solar Alliance (ISA) is a joint initiative of France and India, launched during COP21 with the aim of making an unprecedented effort to promote solar energy.

When was the International Solar Alliance launched?

The International Solar Alliance was launched at the United Nations Climate Change Conference in 2015. The Alliance includes all the member countries of the United Nations. Which of the statements given above is/are correct? Ans: (a) Exp: India and France launched the International Solar Alliance (ISA) to boost solar energy in developing countries.

What will France do with Isa funds?

France will put EUR50 million into a guarantee facility for small renewable energy farm projects in the ISA countries. These funds will make it possible to secure a private investment of EUR3.5 billion and to produce 1.6 GW of solar energy.

What does the International Solar Alliance do?

It will help provide for regular and well-defined cooperation between the Alliance and the United Nations that would benefit global energy growth and development. The International Solar Alliance is headed by the Director General. The Director General leads the operations and carries out the functions of the ISA Secretariat.

Where can I find information about the International Solar Alliance?

For more information, visit the website of the International Solar Alliance. Updated: December 2019

How much insolation does France have?

The insolation in France ranges from 3 sun hours/day in the north to 5 sun hours/day in the south. The output of a solar array is a function of age, temperature, tilt, shading, tracking, and insolation. France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023.

A trusted, reliable partner to French renewable energy companies for over a decade, First Solar supports France's decarbonization ambitions with high-quality, high-performance, eco-efficient photovoltaic (PV) modules that deliver cleaner solar electricity with the lowest carbon footprint.

OverviewSolar PV market by segmentHistorySee alsoExternal linksFrance is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers feed-in tariffs for small-scale solar PV up to 100 kWp on rooftops for self-consumption, with a specific grid tariff for collective users and exemption from the domestic tax on electricity for projects under 1 MW. However, a proposal to reduce solar PV subsidies for ongoing projects until 2030 has created controversy, affecting the sector's growth d...
