Who are Manx solar electrical?

Manx Solar Electrical are the Isle of Man's exclusive Stiebel Eltron service partners. We are also a Mitsubishi ASHP service partner and Dimplex approved and accredited installers. Our engineers install high performance JA Solar /REC and Sun Power solar modules together with SolarEdge optimisers and inverters.

Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.

Peel and Cubico JV submits plans for first Isle of Man Solar Farm & storage. By: Sean Collier. Date: January 25, 2023. 3 min. Plans have been submitted for the first grid-scale solar farm and battery storage on the Isle of Man to provide affordable renewable electricity to residents and businesses and help improve energy security for the Island.

Harness clean energy for your Isle of Man property with Manx Eco Installations. We specialize in solar panel and air source heat pump installations, delivering sustainable solutions for your ...

Lead-Acid Batteries. There are several sources of lead-acid batteries, the most common being cars and other vehicles, although some computer systems also use lead acid batteries. Lead-acid batteries are classified as hazardous waste and therefore can only be transported off island by companies who have obtained the necessary authorisation.

"The solar farm would generate enough power to meet more than 7% of the Isle of Man's current electricity demand and support the Government's aim for electricity on the Island to be 100% green by 2030." The project represents an investment of around £30m across the 40-year anticipated life of the project, with no public investment.

Cost - Solar PV panels can be quite expensive to buy initially. Space - Solar PV panels do take up quite a lot of roof space compared to solar thermal systems. Wasted energy - These panels produce a good amount of energy, however they have no way of storing excess power. Unless you buy a solar battery, this extra energy will be wasted.

Many properties in the Isle of Man are suitable for solar PV installations and you would be surprised how much energy you can produce. Click on the pictures below and you can see how much energy the two systems generate right now!

With solar PV panels: instead of selling unused excess solar generated energy to the grid (at half price), it is stored in your battery system for self-consumption later, ideal when the sun has a break. Off-peak electricity: Manx Utilities offer half price off-peak electricity, your battery system can charge with half price electricity at night time, during the day the entire property can run ...

Solar & Batteries: A Perfect Combination A Battery System can make full use of the power generated by your solar panels, ensuring that any unused power is stored on site to be used ...
