

Does the gxt4 have a battery?

NOTE: The GXT4's battery has been fully-charged before delivery, but some charge will be lost during storage and shipping. To ensure that the battery has adequate reserve power to protect the connected load, charge the battery for 5 hours before putting the UPS into service. Check that the input plugs and loads are connected properly and reliably.

What is included in the gxt4 external battery cabinet shipping package?

NOTE: The GXT4 External Battery Cabinet shipping package includes one battery cabinet, two spacers for tower configuration and one DC-power cable and rack-mounting hardware, including screws, handles and mounting rail kit (not included with "E" models). Inspect the UPS for shipping damage.

What temperature should a gxt4 battery be operated at?

To maintain battery design life, Operate the GXT4 in an ambient temperature of 32°F to 77°F (0°C to 25°C). Optional external battery cabinets are available to extend battery run times. The GXT4 provides an alternate path for utility power to the connected loads in the unlikely event of a UPS malfunction.

What is Vertiv Liebert gxt4?

The Vertiv Liebert GXT4 family features on-line double-conversion technology, which protects equipment against the full range of disturbances, including outages, sags, surges and noise. The Vertiv Liebert GXT4 family of on-line UPS eliminates most disturbances without drawing on battery power, extending battery life and minimizing replacements.

Can the gxt4 replace the internal battery pack safely?

The GXT4 allows you to replace the internal battery pack safely. Refer to Table 7.1 below, for internal battery pack part numbers for GXT4: Read all safety cautions before proceeding. A trained user can replace the internal battery pack when the UPS is always in a restricted access location (such as a rack or server closet).

How does the gxt4 battery charger work?

The battery charger utilizes energy from the utility power and precisely regulates it to continuously float charge the batteries. The batteries are being charged whenever the GXT4 is plugged in, even when the UPS is not turned On. The DC-to-DC converter raises the DC voltage from the battery to the optimum operating voltage for the inverter.

The Liebert GXT4-240VBATKIT is a hot-swappable, internal lead-acid UPS battery kit designed for use with the Liebert GXT4-6000RTL630, GXT4-5000RT230, and GXT4-6000RT230 UPS ...
