

What is PowerSafe OPzS?

PowerSafe OPzS batteries are those that feature tubular plate technology, offering excellent cycling performance and a proven long life under float voltage conditions. The pasted negative flat plate design provides the perfect balance for maximum performance.

What is a powersafe OPzS battery?

PowerSafe OPzS batteries feature tubular plate technology that offers excellent cycling performance together with a proven long life under float voltage conditions. The pasted negative flat plate design provides the perfect balance for maximum performance across a wide capacity range.

What makes EnerSys powersafe OPzS batteries special?

Dilute sulfuric acid electrolyte with specific gravity of 1.240 Lead alloy leak proof terminal and fully insulated solid copper inter-cell connectors Engineered with an optimized plate design, EnerSys PowerSafe OPzS batteries feature an increased capacity exceeding the DIN standard.

Are powersafe OPzS batteries ISO 9001 certified?

Batteries must be installed in accordance with IEC 62485-2 and national/local regulations The management systems governing the manufacture of PowerSafe OPzS products are ISO 9001, ISO 14001 and ISO 45001 certified 2022 EnerSys. All rights reserved. Trademarks and logos are the property of EnerSys and its affiliates unless otherwise noted.

Why should you choose powersafe OPzV batteries?

These single cells benefit from an optimised plate design that gives capacities in excess of DIN standard values. In addition, PowerSafe OPzV batteries offer both an excellent float life and a high cycle life for a truly flexible solution. 6 OPzV 300 320

What is a powersafe OPzS cell used for?

The specification of the PowerSafe OPzS cells make it ideal for a wide range of applications such as telecommunications, power generation and distribution, railway, airport and seaport signalling, computing, emergency lighting, automation and measuring systems. Vent plugs - safety plugs equipped with flame arrestors.

Power Storage Solutions Installation and Service for 5 OPzS 250. We understand that data centers are heavily reliant on batteries for backup power. We also understand that batteries must be redundant and if only one battery in your UPS configuration is not performing; it compromises your overall backup power.

You can learn about the full characteristics of the PowerSafe OPzS closed-type backup batteries by downloading a PDF document from the reference below

Designed to deliver the highest levels of reliability and security, PowerSafe OPzS batteries are used in wide range of applications, including telecommunications, power generation and ...

Power Storage Solutions Installation and Service for 24 OPzS 3000. We understand that data centers are heavily reliant on batteries for backup power. We also understand that batteries must be redundant and if only one battery in your UPS configuration is not performing; it compromises your overall backup power.

Las baterías PowerSafe OPzS utilizan la tecnología de placas tubulares para ofrecer un excelente rendimiento en ciclos y una larga vida útil demostrada en condiciones de flotación. El diseño de sus placas negativas planas empastadas proporciona el equilibrio perfecto para alcanzar el rendimiento máximo en un amplio intervalo de capacidades.

A série GetPower GP OPzS utiliza placas positivas tubulares, o que contribui para uma excelente performance em aplicação; é de média e longa intensidade de descarga. Suas grades são produzidas com chumbo de excelente qualidade, ...

EnerSys PowerSafe 12 OPzS 1200 Summary: EnerSys PowerSafe 12 OPzS 1200 Batteries are engineered with an optimized plate design and they feature increased capacity exceeding the DIN standard. Additionally the die cast tubular plate with low antimony content offers excellent cycling capabilities and a proven long life under float conditions.

EnerSys PowerSafe 6 OPzS 300 Summary: EnerSys PowerSafe 6 OPzS 300 Batteries are engineered with an optimized plate design and they feature increased capacity exceeding the DIN standard. Additionally the die cast tubular plate with low antimony content offers excellent cycling capabilities and a proven long life under float conditions.

EnerSys PowerSafe 6 OPzS 420 Summary: EnerSys PowerSafe 6 OPzS 420 Batteries are engineered with an optimized plate design and they feature increased capacity exceeding the DIN standard. Additionally the die cast tubular plate with low antimony content offers excellent cycling capabilities and a proven long life under float conditions.

Power Storage Solutions Installation and Service for 4 OPzS 200. We understand that data centers are heavily reliant on batteries for backup power. We also understand that batteries must be redundant and if only one battery in your UPS configuration is not performing; it compromises your overall backup power.

The EnerSys range of PowerSafe OPzS batteries has been designed for use in all standby power applications that demand the highest levels of reliability and security.

EnerSys PowerSafe 24 OPzS 3000 Summary: EnerSys PowerSafe 24 OPzS 3000 Batteries are engineered with an optimized plate design and they feature increased capacity exceeding the DIN standard. Additionally the die cast tubular plate with low antimony content offers excellent cycling capabilities and a proven long life under float conditions.

Les batteries PowerSafe OPzS sont conçues avec la technologie ; plaques positives tubulaires qui procure d'excellentes performances en cyclage ainsi qu'une longue durée de vie en floating. Les plaques planes empâtées négatives procurent l'équilibre parfait en matière de performances pour une grande plage de capacités.

The EnerSys range of PowerSafe OPzS batteries has been designed for use in all standby power applications that demand the highest levels of reliability and security. PowerSafe OPzS cells benefit from an optimised plate design that results in increased capacity compared to the requirements of the internationally recognised DIN standard. In addition, the flooded tubular ...

Superior operational safety with fully insulated, connectors, immobilised electrolyte and one-way pressure relief valve with an integral flame arrestor o Flexible installation: vertical or horizontal ...

EnerSys PowerSafe OPzS Standards: Compliant with DIN 40736-1. Compliant with IEC 60896-11. The management systems governing the manufacture of this product are ISO 9001:2008 and ISO 14001:2004 certified. Alpine Power Systems provides critical power services on all EnerSys battery offerings.

EnerSys PowerSafe 6 OPzS 600 Summary: EnerSys PowerSafe 6 OPzS 600 Batteries are engineered with an optimized plate design and they feature increased capacity exceeding the DIN standard. Additionally the die cast tubular plate with low antimony content offers excellent cycling capabilities and a proven long life under float conditions.

Power Storage Solutions Installation and Service for 6 OPzS 600. We understand that data centers are heavily reliant on batteries for backup power. We also understand that batteries must be redundant and if only one battery in your UPS configuration is not performing; it compromises your overall backup power.

standby power applications that demand the highest levels of reliability and security. PowerSafe OPzS cells benefit from an optimised plate design that results in increased capacity compared to the ... o Vent plugs - safety plugs equipped with flame arrestors. Special vent plugs allowing

EnerSys PowerSafe 12 OPzS 1500 Summary: EnerSys PowerSafe 12 OPzS 1500 Batteries are engineered with an optimized plate design and they feature increased capacity exceeding the DIN standard. Additionally the die cast tubular plate with low antimony content offers excellent cycling capabilities and a proven long life

under float conditions.

Power Storage Solutions Installation and Service for 6 OPzS 600. We understand that data centers are heavily reliant on batteries for backup power. We also understand that batteries must be redundant and if only one battery in your ...

Diseñadas con una placa optimizada, las baterías Powersafe OPZ cuentan con una mayor capacidad que supera el estándar DIN. Además, la placa tubular fundida a presión con bajo contenido de antimonio ofrece excelentes capacidades de ciclo y una larga vida útil comprobada en condiciones de flotación. El diseño de placa plana negativa pegada proporciona el equilibrio ...

Engineered with an optimized plate design, EnerSys PowerSafe OPzS batteries feature an increased capacity exceeding the DIN standard. Additionally, the die cast tubular plate design with low antimony offers excellent cycling capabilities ...

The specification of the PowerSafe OPzS cells make it ideal for a wide range of applications such as telecommunications, power generation and distribution, railway, airport and seaport

EnerSys PowerSafe 10 OPzS 1000 Summary: EnerSys PowerSafe 10 OPzS 1000 Batteries are engineered with an optimized plate design and they feature increased capacity exceeding the DIN standard. Additionally the die cast tubular plate with low antimony content offers excellent cycling capabilities and a proven long life under float conditions.

Power Storage Solutions Installation and Service for 12 OPzS 1500. We understand that data centers are heavily reliant on batteries for backup power. We also understand that batteries must be redundant and if only one battery in your UPS configuration is not performing; it compromises your overall backup power.

Power Storage Solutions Installation and Service for 7 OPzS 490. We understand that data centers are heavily reliant on batteries for backup power. We also understand that batteries must be redundant and if only one battery in your UPS configuration is not performing; it compromises your overall backup power.
