

What is a kilovault HLX battery?

The KiloVault® HLX series were designed and tested to meet the demands of high-capacity inverters and chargers, in either an off-grid or grid-tied storage setting. The HLX Series' lithium battery technology stores and delivers energy more efficiently than traditional deep cycle batteries, requiring no maintenance on your part.

Is kilovault a good battery company?

I was impressed by Will's review on the KiloVault 1800 watt battery. I only recently became aware of Kilovault and am impressed since you appear to have a major established company like Alt-E backing you up. I'm interested in putting a 4 battery bank of your 3000 watt Kilovault into my sailboat (e.g. 4 batteries).

Does kilovault have Wi-Fi?

KiloVault delivers the best technology available today with built-in Wi-Fi to manage battery performance, inverter communication, and safety features integrated into the system. The HAB 7.5 comes with a 10-year limited warranty, which is among the longest protection periods for lithium batteries of this size.

Is kilovault a good investment?

KiloVault continues to push the envelope with its excellent lithium solar batteries. With product lines for infinite off-grid applications, KiloVault is a wise investment for any solar power storage system. Through our rigorous testing and research, we at Shop Solar Kits have become a leading voice in the DIY solar generation market.

Does kilovault have a CHLX battery?

Much like the HLX, KiloVault currently sells an 1800 Wh and a 3600 Wh model of the CHLX battery. Obviously, the defining feature of the CHLX is its ability to charge when outside temperatures get below freezing. A look at the spec sheet indicates that the CHLX can only charge from 32 - 113°F (0 - 45°C), so this may cause a bit of confusion.

How long do kilovault batteries last?

In all of KiloVault's batteries, the technology allows for a discharge rate of less than or equal to 2% of the stored capacity. While most people investing in KiloVault batteries use them daily, this low discharge rate allows the company to boast a 6-month shelf life in these massive storage banks.

I'm interested in putting a 4 battery bank of your 3000 watt Kilovault into my sailboat (e.g. 4 batteries).

The system consists of a Schneider Inverter XW Pro 6848 and KiloVault HLX+3600 batteries (48V). The battery's state of charge seems to range from 85% to only 90% or maybe 91%. It appears that I need it to reach 99%. It also seems that if there is a power outage, the best we can achieve is to have the battery start at around 90%.
