Do supercapacitors have a high energy density?

1) The energy densities of electrochemical capacitors are not high. Currently, there remains a noticeable gap between the energy densities of supercapacitors ($< 20 \text{ Wh kg}^{-1}$) and batteries ($30\text{--}200 \text{ Wh kg}^{-1}$). [474 - 476] Improving energy storage density continues to be a key research focus and challenge in the field of supercapacitors.

What is a supercapacitor used for?
