

Who makes lithium-ion batteries in Romania?

This small factory makes it the only manufacturer of lithium-ion batteries in Romania and South-East Europe, according to Profit.ro. A new plant would be developed there in the first stage, for which company representatives say they have the construction permit. Adrian Polec and Vicentiu Ciobanu founded the company as shareholders and managers.

How much will Romania Invest in a lithium plant?

A memorandum of understanding now signed by the company with the Romanian Ministry of Energy provides for investments of 400 million euros for this purpose. According to the company, the plant in Romania would create about 700 direct and indirect jobs and produce enough lithium hydroxide for 500,000 electric cars per year.

What type of battery cells will be built in Romania?

There are no details yet on the type of battery cells to be built in Romania. If Dacia is to be supplied, the cells will be very cheap, as the carmaker had recently repeatedly emphasised that it wanted to offer not the best, but the cheapest electric car.

Does Rombat produce lithium ion batteries?

Rombat said it will also invest in an oxygen production facility at Copșa Mică. Last year, Rombat said it intended to also produce lithium ion batteries intended for customers developing photovoltaic parks or domestic users interested in installing home solar energy systems.
