

Will Macao build a photovoltaic power system by 2025?

Responding to a Macao News inquiry, the government also shared plans to build photovoltaic power generation systems on at least 30 per cent of the rooftop areas of new public housing and public facilities by 2025.

Can Macao increase solar energy?

The Macao government also sees an opportunity to increase solar energy. To encourage the installation of PV systems, officials passed a set of safety and installation regulations in 2015.

Is Macau a good place to invest in solar energy?

Song and colleagues have no doubts: "Macao has some of the richest solar resources in the world" (with average annual sunlight time exceeding 1000 h, providing about 5000 MJ/m²). "Clearly, Macau has a tremendous potential for developing solar energy, especially a grid-connected photovoltaic system.

Who is SunPower-Gen?

In 2001, SunPower-Gen was established to serve Engineering sectors. Today, we design, manufacture, and install most of the engineered products and systems for our clients. We have been serving the industries for over 49 years with a commitment to providing excellent Products and Services.

Does offshore wind energy make sense in Macau?

"In our view, as external observers, offshore wind energy in Macau's territorial waters makes sense, as does the development of distributed generation of photovoltaic energy. Macau has a lot of sun and many roofs. There is a potential to develop this vector in the medium-to-long term."

Can Macao achieve net zero emissions by 2050?

To curb climate change and reach net zero emissions by 2050, countries and regions around the world are rushing to cut fossil fuels and boost clean energy usage. As a commercial hub, Macao faces the same challenge.

Responding to a Macao News inquiry, the government also shared plans to build photovoltaic power generation systems on at least 30 per cent of the rooftop areas of new public housing and public facilities by 2025.
