

Why do we need a mainspring generator?

“Mainspring's technology helps to support our move to net zero carbon energy. Mainspring generators improve energy independence and buffer our growing use of solar power, while offering the potential future use of zero carbon fuels like green hydrogen and others.”

Where is mainspring energy based?

Based in Menlo Park, Calif., Mainspring is backed by top-tier investors. For more information on the company, technology, and products, please visit [SOURCE Mainspring Energy, Inc.](#)

Is mainspring a 'resilient' electric grid?

Major advancement for resilient, clean electricity MENLO PARK, Calif., June 22, 2022 /PRNewswire/-- In an important breakthrough towards a resilient, zero-carbon electric grid, Mainspring Energy today announced that its Mainspring Linear Generator has passed key tests directly running 100% hydrogen and 100% ammonia fuels at high efficiencies.

How much money has mainspring raised?

Mainspring has raised \$133 million to date from investors including Microsoft co-founder Bill Gates, Khosla Ventures, utility AEP and the venture arms of oil giant Statoil and energy company Centrica.

What is the scalability of the mainspring product?

The scalability of the Mainspring product allows for use in behind-the-meter applications as well as in large grids, microgrids, data centers, and similar operations that require support for 24/7 clean power, clean backup generation, and clean firming capabilities.

What fuels does mainspring use?

Its unique fuel flexibility allows it to automatically switch between fuels using innovative software-based control. In addition to hydrogen and ammonia, the Mainspring product runs on biogas, renewable natural gas, and other widely available gaseous fuels, and can switch between fuels automatically with software-based control.

Mainspring Energy | 44,229 followers on LinkedIn. Accelerating the transition to the affordable, reliable, net-zero carbon grid of the future. | Driven by our vision of the affordable, reliable ...

**Key Takeaways.** Mainspring Energy has developed an innovative linear generator technology that offers high efficiency, fuel flexibility, and seamless integration with renewable sources, marking a major advancement in clean power generation.. The company's linear generators can operate on various renewable fuels, including biogas, green hydrogen, ...

**About Mainspring Energy** Mainspring Energy manufactures and delivers an innovative, fuel-flexible onsite

power generator, the Mainspring Linear Generator, that rapidly adds new power capacity and accelerates the transition to the reliable, affordable, sustainable electric grid. The Linear Generator is fully dispatchable and scalable from 250 kW ...

Energy Project Success & Resources. Mainspring customers are achieving fast deployment of new capacity, cost savings, reduced emissions, increased resilience, and other essential benefits. ... Integrate with solar and storage to maximize power strategy. Clean Transition seamlessly without retrofit from pipeline gas to hydrogen, renewable gas ...

Longer-duration battery energy storage systems (>1.5 hours) actually earned 56% of their revenues from Energy arbitrage. While shorter-duration batteries earned just 19% of their revenues from Energy.

MENLO PARK, Calif., May 24, 2022 -- Onsite power generation provider Mainspring Energy Inc. today announced that Lineage Logistics, the world's largest temperature-controlled industrial REIT and logistics solutions provider, has signed an agreement to deploy up to 150 Mainspring Linear Generators across its network of distribution facilities ...

The 20-foot long generators, built by Menlo Park, California-based Mainspring Energy Inc., produce zero-carbon electricity at each DC site by shuttling a magnet between ...

Lineage estimated that while the 3.3-MW rooftop array could provide up to 73% of the facility's needs, if two 230-kW Mainspring Energy Linear Generators were integrated onsite, they could firm...

WASHINGTON, D.C. -- As part of the Biden-Harris Administration's historic Investing in America agenda, the U.S. Department of Energy (DOE) today announced \$428 million for 14 projects to accelerate domestic clean energy manufacturing in 15 coal communities across the United States. The projects, led by small-and medium-businesses in communities ...

The \$150 million deal includes financing structures akin to power-purchase agreements to allow customers to use Mainspring's units to replace on-site load served by the grid, as well as provide ...

Integrate with solar and storage to maximize power strategy. Clean Transition seamlessly without retrofit from pipeline gas to hydrogen, renewable gas, or ammonia. Onsite Generation Operates Islanded With Near-Zero NOx Emissions

Major advancement for resilient, clean electricity. MENLO PARK, Calif., June 22, 2022 /PRNewswire/ -- In an important breakthrough towards a resilient, zero-carbon electric grid, Mainspring Energy ...

Dive Brief: ABM announced Thursday that it will deploy Mainspring Energy's power generation technology to enhance its electric vehicle charging solutions for fleet, commercial and industrial customers.; Mainspring Energy's Linear Generator provides on-site power by converting linear motion into electricity and can operate

directly on renewable and ...

A set of Mainspring Energy linear generators. Schneider Electric and Mainspring Energy on March 20, 2024, said they formed a partnership to use Mainspring's fuel-flexible linear generators in ...

18 MWh of energy storage (equivalent to three hours of autonomy) 9 MW of charging capacity (for powering up to 96 high-powered EV trucks simultaneously) 3 MW of fuel flexible generation capacity (natural gas, renewable natural gas, hydrogen) 1.3 tons of hydrogen-to-EV-ready blended capacity per day; 27,000 miles of heavy-duty truck charging per day

The Mainspring Linear Generator delivers an unmatched level of flexibility for the transition ahead. It's local so you can site where power is needed, it's dispatchable so you can ramp up and down to complement renewables, and it's fuel-flexible so you can operate on the cleanest fuels available today and in the future.

Driven by its mission to advance global access to low-carbon, dispatchable energy, Mainspring has developed a new category of power generation -- the linear generator -- that delivers onsite, 24/7, fuel-flexible power at lower cost and lower carbon than the electric grid.

Onsite power generation provider Mainspring Energy Inc. today announced that its customer Lineage (NASDAQ: LINE), the world's largest temperature-controlled warehouse REIT, has signed an agreement ...

The linear generator, developed by Mainspring Energy, is a new fuel-flexible power generation technology that converts a variety of clean fuels, including wastewater treatment plant biogas, into clean and reliable electricity. NapaSan will be the first-ever wastewater treatment facility to run a linear generator using methane produced in an ...

Since significant renewable penetration can mean curtailing, or "wasting" energy that's not used when generated, green hydrogen presents an important method to store and transport renewable...

On Tuesday, Mainspring's vision garnered a vote of confidence from U.S. utility and renewables giant NextEra in the form of a \$150 million agreement with its business ...

The global market for clean energy and carbon reduction technologies is anticipated to reach a minimum of \$23 trillion by 2030. Investing directly in the domestic manufacturing sector's small- and medium-sized businesses, which ...

The Mainspring Linear Generator, developed by Mainspring Energy, a Silicon Valley-based startup, could be one of the answers to the storage challenge. We are joined by Mainspring CEO Dr. Shannon Miller, a Stanford alumna with a PhD in mechanical engineering.

The announcement follows Lineage's November 2021 deployment of two Mainspring Linear Generators in

tandem with 3.3 MW of solar arrays to achieve its first cold ...

Lineage announced in late 2021 that it would be the first cold storage facility to generate 100 percent of its own electricity with rooftop solar and Mainspring Linear Generators. This latest agreement is the first deployment of Mainspring's revolutionary energy technology has been deployed in Texas.

PG& E is exploring greening those microgrids, trialling battery storage alongside mainspring linear generators that run on different types of gas. It is also, with gravity energy storage startup-turned BESS integrator Energy Vault, building a large-scale system that combines lithium-ion (Li-ion) batteries with a green hydrogen electrolyser.

Mainspring's linear generators match power output with building demand while integrating with onsite solar and energy storage, enabling the continued rapid adoption of renewables. In addition, Mainspring's technology provides power when the grid is down, making it the ideal backbone of any renewable microgrid.

Mainspring Energy is a technology company focused on providing clean and reliable power solutions through its innovative Mainspring Linear Generator. Founded with the vision of supporting a net-zero carbon grid, Mainspring aims to deliver local power generation that can adapt to various fuel types and operational needs.

Onsite power generation provider Mainspring Energy Inc. announced that its customer Lineage (NASDAQ: LINE), the world's largest temperature-controlled warehouse REIT, has signed an agreement to deploy 33 Mainspring Linear Generators in the state of Texas at five Lineage facilities. The products are scheduled to be installed and operating in 2025. ...

The global market for clean energy and carbon reduction technologies is anticipated to reach a minimum of \$23 trillion by 2030. Investing directly in the domestic manufacturing sector's small- and medium-sized businesses, which contribute to \$1 trillion in gross revenue and provide more than five million jobs, rapidly builds capacity for clean energy production and maximizes the ...

"Mainspring's technology helps to support our move to net zero carbon energy. Mainspring generators improve energy independence and buffer our growing use of solar power, while ...

MENLO PARK, Calif., Sept. 21, 2022 -- Clean power generation provider Mainspring Energy Inc. today announced the final close of its Series E financing at \$290 million. On May 24th this year, simultaneously with announcing a major commercial sales deal, Mainspring disclosed it had completed its first close of the Series E at \$150 million. The ...
