

What is the energy storage initiative?

It can improve grid operations,reduce energy costs,provide backup power through storms,and benefit the local economy. The Energy Storage Initiative aims to make the Commonwealth a national leader in the emerging energy storage marketrequiring a 1,000 Megawatt hour (MWh) energy storage target to be achieved by December 31,2025

What is the energy storage Initiative (ESI)?

The Energy Storage Initiative (ESI) aims to make the Commonwealth a national leader in the emerging energy storage market. Energy storage is a significant strategic opportunity for Massachusetts. It can improve grid operations,reduce energy costs,provide backup power through storms,and benefit the local economy.

What is the expected in-service date for a battery storage system?

The expected in-service date for the project is May 26,2028. Boulder,Colorado-based Flatiron Energy develops and operates standalone utility-scale battery storage systems in the Northeast and Mid-Atlantic US. The company says its mission is to reduce emissions that contribute to climate change and environmental injustice.

A 6MW / 48MWh battery energy storage system paired to a 15MW diesel generator has gone online on Nantucket, in what has been described by project owner National Grid as the biggest such system in New England to ...

We had first reported on the proposed Framingham geothermal heating project back in 2022. The first-of-its-kind network geothermal system in the City of Framingham will run through two full heating and cooling seasons ...

Massachusetts tax benefits for energy storage. Massachusetts does not have any state-specific tax incentives for energy storage systems. However, Bay Staters installing a solar battery can still save on their taxes with the federal investment tax credit (ITC). The ...

On November 21, 2024, Massachusetts Governor Maura Healy signed into law sweeping clean energy legislation (St. 2024 c. 239, An Act Promoting a Clean Energy Grid, Advancing Equity and Protecting Ratepayers, ...

Dubbed the "Docklands," the development will include an energy storage facility in its first phase and the construction of manufacturing, lab, office, retail, maker, and residential space in ...

Building energy storage in Massachusetts is critical to meeting the state's ambitious climate law, the Global Warming Solutions Act (GWSA). The GWSA requires the Commonwealth to reach net zero emissions by 2050, with ...

Recognizing the key role energy storage must play in meeting our energy and climate goals and the ongoing challenges to its deployment and use, Section 80(a) of the 2022 Climate Act authorized DOER and the Massachusetts Clean Energy Center (MassCEC) to conduct a study ("the Study") to provide: An overview of the existing energy storage market in ...

A Massachusetts pilot program provides a replicable and scalable model for bringing renewable energy, battery storage, and electrification to low-income households. The ...

Detailed info and reviews on 38 top Energy companies and startups in Boston in 2025. Get the latest updates on their products, jobs, funding, investors, founders and more. ... Respire Energy is developing the next-generation metal-air battery for microgrid and utility-scale energy storage. Using earth-abundant materials and unique chemistry ...

Massachusetts solar incentives are some of the most valuable in the country, significantly reducing the cost of solar and energy storage. Solar Tax Credit: Most solar energy installations are eligible for the Residential Clean Energy Credit, previously called the Solar Investment Tax Credit (ITC). Eligible homeowners can deduct up to 30% of their solar power system's costs ...

Covers the role of energy storage, including batteries, pumped hydro, and emerging technologies that support grid reliability and renewable energy deployment. Battery. Long Duration. Pumped Storage. The Latest. ...

BOSTON -- The U.S. Department of Energy (DOE) today announced it selected the New England states' Power Up New England proposal to receive \$389 million. Power Up, submitted to DOE through the second round of the competitive Grid Innovation Program, features significant investments in regional electric infrastructure including proactive upgrades to points ...

In May 2015, Governor Charlie Baker (R) introduced a conceptual Energy Storage Initiative (ESI) in Massachusetts to incentivize energy storage companies to do business in the state, accelerate early-stage commercial energy storage technologies, expand the market for these technologies, and develop policy recommendations to advance these goals.

Massachusetts ranks 23rd in the country in installing advanced energy storage. recent years. According to IHS, a leading business data provider, average lithium-ion battery prices decreased in cost over 50 percent between ...

A render of the building that would house the BESS project. Image: Flatiron Energy / System operator ISO New England has given the go-ahead for a 300MW/1,200MWh indoor BESS located in Boston, ...

ISO New England has given the thumbs up to a project proposed by Flatiron Energy and envisaging the installation of a 300-MW/1,200-MWh battery energy storage system (BESS) in Boston, Massachusetts.

Massachusetts energy storage facts. Battery storage capacity as of 2023: 0.26 GW; Capacity added in 2023: 0.02 GW; Average added capacity per year: 0.06 GW [last 3 yrs] In 2018, the Massachusetts State Legislature established the goal of 1,000 MWh of energy storage by the end of 2025.

Order for a hearing to discuss the use of the battery energy storage systems (BESS) in the City of Boston. This matter was sponsored by Councilors Brian Worrell and Liz Breadon and was referred to the Committee on January 15, 2025.

ISO New England has given the thumbs up to a project proposed by Flatiron Energy and envisaging the installation of a 300-MW/1,200-MWh battery energy storage ...

Delorean Power to build 5MW/22MWh energy storage project in Massachusetts. October 12, 2023. US battery developer Delorean Power and the Holden Municipal Light Department (HMLD), a utility in the US state of Massachusetts, have unveiled a new battery storage project in the town of Massachusetts. ... Developer BlueWave talked Energy ...

US solar and energy storage development platform ESA Solar Energy on Monday unveiled plans for two battery energy storage projects in Massachusetts with a combined ...

Batteries are now eligible for state energy efficiency incentives in Massachusetts, and this first-in-the-nation policy should be considered by other states, according to a new report published by Clean Energy Group (CEG). The report details ...

The Massachusetts Energy Siting Facilities Board has approved two energy storage facilities with a combined capacity of 400 MW/800 MWh. This decision overturns previous rulings that hindered the development of these ...

DOER partnered with the Massachusetts Clean Energy Center (MassCEC) to conduct a study on the existing energy storage market in the Commonwealth and an ...

Early Adoption and Growth: Massachusetts was the first state in the U.S. to emphasize battery storage in its energy efficiency plans, allocating substantial funds for ...

The Energy Storage Initiative aims to make the Commonwealth a national leader in the emerging energy storage market requiring a 1,000 Megawatt hour (MWh) energy storage target to be achieved by December 31, ...

The Solar Massachusetts Renewable Target (SMART) Program, launched in 2018, is the Department of Energy Resources (DOER)'s incentive program, which supports the development of solar in Massachusetts. ... in decreasing global ...

Boston battery companies are raking in capital to innovate the industry. Boston. ... Ambri is the developer of a liquid metal battery system that offers a longer-duration energy storage solution for grid infrastructures, ...

The Commonwealth of Massachusetts is one signature away from enacting a sweeping clean energy bill that will streamline the siting process for clean energy projects, promote energy storage, and increase contracts for offshore wind power to 30 years.

Massachusetts starts inquiry into energy storage eligibility for net metering Published Oct. 9, 2017 By. Peter Maloney Contributing Editor. Sunrun. Dive Brief: The Massachusetts Department of Public Utilities (DPU) has begun an ...

Sollect Energy is launching an energy storage division. In launching the new division, Sollect has signed an agreement with NEC Energy Solutions, a wholly-owned subsidiary of NEC Corporation, to sell NEC's DSS ...

Energy storage is a significant strategic opportunity for Massachusetts. It can improve grid operations, reduce energy costs, provide backup power through storms, and benefit the local economy.
