

Can Indonesia achieve net-zero energy ambitions?

As a result, Indonesia's climate commitments in the energy sector may progress slower than previously anticipated. However, the longer the country remains dependent on fossil fuels, the more difficult it will be for its leaders to meet the net-zero ambitions. Evidence suggests that Indonesia's energy transition should be well under way.

Will Indonesia achieve net-zero emissions by 2060?

PT SMI President Director Edwin Syahrudat and ETP Fund Director Philip Rose attended the ceremony. Indonesia pledges to achieve net-zero emissions by 2060 through an effective and inclusive transition.

Is solar PV a viable alternative to fossil fuels in Indonesia?

On the cost side, the picture is more nuanced. Solar PV brings fuel savings from both fossil fuels (5.5-7%) and biomass (which comes at a premium) but the current regulations in Indonesia do not allow solar PV to compete in the short term when considering the total system cost. However, the authorities have options.

Renewable energy projects are primarily being developed by Perusahaan Listrik Negara (PLN, the state-owned electric utility), Pertamina (the state-owned oil and gas company that has primarily focused on geothermal), ...
