

What is Samoa's energy plan?

to energy development. The plan will address Samoa's energy issues, promote sustainable energy development, ensure long-term energy security, economic growth, and enhance energy efficiency to reduce the country's dependence on fossil fuels, minimize environmental impact, and create new opportunities for innovation, em

Why is Samoa building new hydropower stations?

Samoa is therefore taking a proactive approach to increasing its renewable energy generation and reducing its greenhouse gas emissions. Building new hydropower stations means Samoa is on track to greater energy independence and less reliance on costly diesel fuel oil.

What is the energy sector in Samoa?

remote areas in Samoa. The energy sector in Samoa is currently undergoing a significant transformation as the country is transitioning towards sustainable, affordable, an reliable energy supply. The SESP 2017 - 2022 comprised five (5) sub-sectors, (i) Renewable Energy, (ii) Electricity, (iii) Transport, (iv) Petroleum and (v) Institutio

What are the energy issues faced by Samoa's energy sector?

all energy stakeholders. The Plan will report on the energy issues faced by Samoa's energy sector, which includes high energy costs, dependence on imported fossil fuels, limited access to energy services in rural areas, and institutional capacity constraints to manag

Which energy sources are used in Samoa in 2022?

ctricity Sources in 2022 The Electric Power Corporation (EPC), as the sole provider of electricity in Samoa, currently utilizes electricity generated from the renewable assets including those produced by Indepeude Power Producers (IPP). The Samoa Energy Database has recorded up to 22 community-based biogas systems ins

How does Samoa produce electricity?

Until recently, Samoa's major form of electricity production was diesel generation. Diesel for electricity production forms 20% of Samoa's annual petroleum imports and 50% of the country's total installed electrical capacity. Hydropower, solar and wind generation contribute the other half of Samoa's installed capacity (see Figure below).
