

What does the Department of energy do in Lesotho?

The Department of Energy is committed to increasing energy access and ensuring security of energy supply in the country. The Department of Energy is tasked with promotion and implementation of renewable energy projects and programs. A website of the Department of Energy (DoE) in Lesotho with an Energy Management Information System (EMIS).

Can Lesotho export wind power?

Breeze Power,a company owned jointly by GOKL and Harrison &White Investments,is investigating twelve sites for wind power generation. Energy demand is growing in South Africa and the rest of the region, and Lesotho has the potentialto export renewable power.

How much hydropower does Lesotho generate?

Currently,Lesotho generates 72 megawattsof hydropower through the 'Muela Hydropower plant,which does not satisfy domestic demand. The country will generate 80 MW following the construction of the Polihali Dam expected to be completed in 2028. There is potential, and there are plans,to expand hydropower capacity and establish wind farms.
