

What is Morocco's energy strategy?

When Morocco introduced its national energy strategy in 2009, it initiated an energy transition which aims to ensure that about half of installed electricity generating capacity will come from renewable energy sources by 2030.

Is Morocco a driver of green and competitive energy?

With the new development model published in June 2021, Morocco also wants to position itself as a driver of green and competitive energy. In view of this, the country is implementing ambitious projects to expand renewable energy sources.

How much energy does Morocco produce from renewables?

Production of energy from renewables lagged behind a little, at closer to 20% of the country's total in 2019. But the country has come a long way. Morocco has since pledged to increase the renewables in its electricity mix to 52% by 2030, made up of 20% solar, 20% wind and 12% hydro.

How many megawatts will Morocco generate by 2020?

The aim of the project was to create 2,000 megawatts of solar generation capacity by 2020. The Moroccan Agency for Solar Energy (MASEN), a public-private venture, was established to lead the project. The first plant, Ouarzazate Solar Power Station, was commissioned in 2016.

Does Morocco need a solar power station?

Ouarzazate Solar Power Station. As of 2019, renewable energy in Morocco covered 35% of the country's electricity needs.

Who is developing a solar power plant in Morocco?

The solar power plant in Morocco was developed by Saudi Arabian firm ACWA Power. Funding also came from the World Bank and European Investment Bank. Mr Zniber mentions that private Moroccan firms like his are planning to export solar and wind-generated electricity to Europe, and green hydrogen - hydrogen that has been created by renewable energy.
